The Time Traveller Ronald L. Mallett, Bruce B. Henderson, 2007 Follows the author's journey of self and scientific discovery as he describes the physics that makes time travel possible This book is a human memoir and also a story of astonishing achievement **The Time Traveller** Bruce Henderson, Ronald L Mallett, 2009-11-24 Ron Mallett was just 10 when his father died suddenly Devastated he found solace in the science fiction of H G Wells believing that if he could build a time machine he could go back into the past warn his father and perhaps save his life Ronald Mallett is now a professor of theoretical physics Remarkably this working class African American boy from the Bronx stuck with his vision overcoming poverty and prejudice in the pursuit of his obsession This is the story of his extraordinary journey of self and scientific discovery With simple language and elegant metaphor he lays out his theories and presents the reader with what is an actual blue print for a time machine A dramatic and compelling memoir it is also a brilliant introduction to a riveting but generally baffling subject and a truly inspirational account of astonishing achievement *The Time Machine Hypothesis* Damien Broderick, 2019-07-12 Every age has characteristic inventions that change the world In the 19th century it was the steam engine and the train For the 20th electric and gasoline power aircraft nuclear weapons even ventures into space Today the planet is awash with electronic business chatter and virtual reality entertainment so brilliant that the division between real and simulated is hard to discern But one new idea from the 19th century has failed so far to enter reality time travel using machines to turn the time dimension into a two way highway Will it come true as foreseen in science fiction Might we expect visits to and from the future sooner than from space That is the Time Machine Hypothesis examined here by futurist Damien Broderick an award winning writer and theorist of the genre of the future Broderick homes in on the topic through the lens of science as well as fiction exploring some fifty different time travel scenarios and conundrums found in the science fiction literature and film **This Book is from the Future** Marie D. Jones, Larry Flaxman, 2012-07-22 A very engaging read about how time travel has captured our imaginations You will find a number of surprising discoveries awaiting you Fred Alan Wolf author of Taking the Quantum Leap The idea of time travel has tantalized humans for millennia We can send humans into space but roaming through time has eluded us Do the laws of physics demand that we stay forever trapped in the present This Book Is From the Future will explore Time travel theories and machines of the past present and future Time and the multiverse why wormholes parallel universes and extra dimensions might allow for time travel The paranormal aspects of time Might we already be mentally time traveling Mysterious time shifts slips and warps that people are reporting all over the world Are we experiencing coexisting timelines Time travel conspiracy theories Are we already walking among real time

travelers Has a real time machine already been created in a top secret government facility From pop culture fantasies to wild conspiracy theories to the latest scientific thinking This Book Is From the Future is a fascinating exploration of our collective obsession with time Jones and Flaxman cover the subject from just about every angle with a dash of humor and the serious scientific curiosity it deserves Stephen Wagner author of True Tales of the Ouija Board A superb study of how past present and future may be manipulated controlled and even altered Back to the Future and H G Wells s The Time Machine might not be mere fiction after all Nick Redfern author of Final Events

Plato's Labyrinth Michael Carroll,2022-01-03 One wants to preserve history Another seeks to resurrect a legendary army A third plans to infuse the past with technology to save millions If you could go back in time what would you do Something strange is going on at ChronoCorp Coffin shaped pods and glowing talismans feathered dinosaurs and ancient murals the private laboratory s quirky scientists have been quite busy indeed The reason Katya Xavier Todd and colleagues are on a singular scientific mission to surpass the limits of modern physics and unlock the power of time travel Their early experiments have proved a resounding success taking them to far flung places in both time and space from nineteenth century New York to ancient Thera But as their research progresses the stakes get ever higher Enter a world of competing interests and conflicting timelines where nothing is quite what it seems Why is Xavier acting so oddly Where exactly did their eccentric benefactor Mila van Dijk get her wealth What is the Primus Imperium and what does its mysterious head known only as The Ambassador want from them Come along as the colleagues at ChronoCorp and their ragtag allies race to sew up several unravelling timelines battling those who would harm them in the past and present to preserve what is left of their future
