Elkin O. Luis, Francisco Ceric, Martín Martínez, Elena Bermejo Martins, 2023-06-23

*Mindfulness in a Digital World* Dave Harley, 2022-11-14 Using a lens of mindfulness, this book explores how digital dependencies can displace attention and undermine attentional control, leading to experiences of stress and mindless involvement with digital technology. Using qualitative interviews with teachers and students of mindfulness programmes, the book explores the challenges and opportunities for reconciling digital interactions with mindful practice. A phenomenological analysis of participants' digital experiences shows three different imperatives relating to digital capabilities: hyper reality and algorithms that can drive unconscious forms of interaction, and encourage a delegation of attentional control that draws users away from the present moment. The book concludes by exploring the implications of these extra conscious imperatives for understanding digital addiction. It also provides a set of guidelines for a digital approach to mindfulness practice that can encourage beneficial relationships with digital technology into the future.
