Engineering Secure Software and Systems Juan Caballero,Eric Bodden,Elias Athanasopoulos,2016-03-28 This book constitutes the refereed proceedings of the 8th International Symposium on Engineering Secure Software and Systems ESSoS 2016 held in London UK in April 2016 The 13 full papers presented together with 3 short papers and 1 invited talk were carefully reviewed and selected from 50 submissions The goal of this symposium is to bring together researchers and practitioners to advance the states of the art and practice in secure software engineering The presentations and associated publications at ESSoS 2016 contribute to this goal in several directions First

by improving methodologies for secure software engineering such as flow analysis and policy compliance. Second with results for the detection and analysis of software vulnerabilities and the attacks they enable. Finally for securing software for specific application domains such as mobile devices and access control. *Universal Access in Human-Computer Interaction: Aging and Assistive Environments* Constantine Stephanidis, Margherita Antona, 2014-05-15. The four volume set LNCS 8513 8516 constitutes the refereed proceedings of the 8th International Conference on Universal Access in Human Computer Interaction UAHCI 2014 held as part of the 16th International Conference on Human Computer Interaction HCII 2014 held in Heraklion Crete Greece in June 2014 jointly with 14 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 251 contributions included in the UAHCI proceedings were carefully reviewed and selected for inclusion in this four volume set. The 75 papers included in this volume are organized in the following topical sections: design for aging, health and rehabilitation, applications, accessible smart and assistive environments, assistive robots and mobility, navigation and safety.

Forensic science is playing an increasingly important role in criminal investigations as it provides scientific methods and techniques to gather and analyse evidence from crime scenes. Forensic evidence can be crucial in identifying suspects linking them to the crime scene and helping to secure convictions in court. In this sense, forensic science is seen as an aid to criminal investigation, providing reliable and objective evidence that can be used to uncover the truth behind criminal activities. The integration of forensic science with law and criminology is creating a

new era of progressive thinking where advanced techniques are being developed to better understand the nature of crime and the behaviour of criminals. With the help of forensic science investigators can obtain speedy justice and bring criminals to book. However this requires appropriate measures to be taken for the efficient execution of forensic investigations including the use of modern technology and the training of professionals in the latest forensic techniques. Given the importance of forensic science in the criminal justice system it is essential to have a comprehensive understanding of its different aspects. This includes the collection, preservation and analysis of forensic evidence as well as the interpretation of this evidence in the context of criminal investigations. This book covers these topics in detail providing valuable insights for professionals, practitioners, academics and students of the related fields.

Machine Learning for Computer and Cyber Security Brij B. Gupta, Quan Z. Sheng, 2019-02-05. While Computer Security is a broader term which incorporates technologies, protocols, standards and policies to ensure the security of the computing systems including the computer hardware, software and the information stored in it. Cyber Security is a specific growing field to protect computer networks offline and online from unauthorized access, botnets, phishing, scams, etc. Machine learning is a branch of Computer Science which enables computing machines to adopt new behaviors on the basis of observable and verifiable data and information.
