

CHAPTER 2 YAMAHA AUTOLUBE

2-1 WHAT IS THE YAMAHA AUTOLUBE ?

The Yamaha Auto Lube is an automatic lubricating device for 2-cycle engine newly developed by Yamaha Technical Research Institute. It controls the amount of oil depending both on the engine RPM and on the load under any operating conditions and forces the proper amount of oil to the engine all the times by means of the precision-machined pump.

As a result, the new Yamaha 2-cycle engine does not use the gasoline-oil mixture that other makers' engines must do. It is for the first time in the world that such a device was applied to the production model of 2-cycle engine.

The Yamaha Auto Lube is the best of the lubricating systems for 2-cycle engine.

2-2 AUTOLUBE FEATURES

The conventional lubricating system uses the gasoline-oil mixture in the fixed ratio of 20:1. This ratio was determined on the basis that it would not cause lack of oil at top speed and full throttle.
