Search Methodologies Edmund K. Burke,Graham Kendall,2013-10-18 The first edition of Search Methodologies
Introductory Tutorials in Optimization and Decision Support Techniques was originally put together to offer a basic
introduction to the various search and optimization techniques that students might need to use during their research and this
new edition continues this tradition Search Methodologies has been expanded and brought completely up to date including
new chapters covering scatter search GRASP and very large neighborhood search The chapter authors are drawn from
across Computer Science and Operations Research and include some of the world s leading authorities in their field The book
provides useful guidelines for implementing the methods and frameworks described and offers valuable tutorials to students
and researchers in the field As I embarked on the pleasant journey of reading through the chapters of this book I became
convinced that this is one of the best sources of introductory material on the search methodologies topic to be found The
book s subtitle Introductory Tutorials in Optimization and Decision Support Techniques aptly describes its aim and the
editors and contributors to this volume have achieved this aim with remarkable success The chapters in this book are
exemplary in giving useful guidelines for implementing the methods and frameworks described Fred Glover Leeds School of
Business University of Colorado Boulder USA The book aims to present a series of well written tutorials by the leading
experts in their fields Moreover it does this by covering practically the whole possible range of topics in the discipline It
enables students and practitioners to study and appreciate the beauty and the power of some of the computational search
techniques that are able to effectively navigate through search spaces that are sometimes inconceivably large I am convinced
that this second edition will build on the success of the first edition and that it will prove to be just as popular Jacek
