Developing Software for Symbian OS Steve Babin, 2008-02-28 Many problems encountered by engineers developing code for specialized Symbian subsystems boil down to a lack of understanding of the core Symbian programming concepts. Developing Software for Symbian OS remedies this problem as it provides a comprehensive coverage of all the key concepts. Numerous examples and descriptions are also included which focus on the concepts the author has seen developers struggle with the most. The book covers development ranging from low level system programming to end user GUI applications. It also covers the development and packaging tools as well as providing some detailed reference and examples for key APIs. The new edition includes a completely new chapter on platform security. The overall goal of the book is to provide introductory coverage of Symbian OS v9 and help developers with little or no knowledge of Symbian OS to develop as quickly as possible. There are few people with long Symbian development experience compared to demand due to the rapid growth of Symbian in recent years and developing software for new generation wireless devices requires knowledge and experience of OS concepts. This book will use many comparisons between Symbian OS and other OSes to help in that transition. Get yourself ahead with the perfect introduction to developing software for Symbian OS.

**Java ME on Symbian OS** Roy Ben Hayun, 2009-02-11 In this book experts from Symbian, Nokia and Sun Microsystems expose the power of Java ME on Symbian OS. It is logically divided into four main sections: Introduction to Java ME and programming fundamentals; Java ME on Symbian OS core and advanced chapters; Drill down into MSA DoJa and MIDP game development; Under the hood of the Java ME platform. The book also includes two appendixes on SNAP Mobile technology and WidSets. With over ten years experience in Java technologies and over four years experience at Symbian, the lead author Roy Ben Hayun now works for Sun Microsystems as a systems architect in the Engineering Services group which leads the development, marketing and productizing of Java ME CLDC and CDC on different platforms.
