Violent Crime Diane L. Green, Albert R. Roberts, 2008-06-23 Over the past two decades violent crime has become one of the most serious domestic problems in the United States Approximately 13 million people nearly 5% of the U S population are victims of crime every year and of that approximately one and a half million are victims of violent crime Ensuring quality of life for victims of crime is therefore a major challenge facing policy makers and mental health providers Helping Victims of Violent Crime grounds victim assistance treatments in a victim centered and strengths perspective The book explores victim assistance through systems theory the holistic notion of examining the client in his/her environment and a key theoretical underpinning of social work practice The basic assumption of systems theory is homeostasis A crime event causes a change in homeostasis and often results in disequilibrium The victim's focus at this point is to regain equilibrium Under the systems metatheory coping crisis and attribution theories provide a good framework for victim centered intervention Stress and coping theories posit that three factors determine the state of balance perception of the event available situational support and coping mechanisms Crisis theory offers a framework to understand a victim's response to a crime The basic assumption of crisis theory asserts that when a crisis occurs people respond with a fairly predictable physical and emotional pattern The intensity and manifestation of this pattern may vary from individual to individual Finally attribution theory asserts that

individuals make cognitive appraisals of a stressful situation in both positive and negative ways These appraisals are based on the individual's assertion that they can understand predict and control circumstances and result in the victim's assignment of responsibility for solving or helping with problems that have arisen from the crime event In summary these four theories can delineate a definitive model for approach to the victimization process It is from this theoretical framework that *Treating Victims of Violent Crime* offers assessments and interventions with a fuller understanding of the victimization recovery process The book includes analysis of victims of family violence child abuse elder abuse partner violence as well as stranger violence sexual assault homicide and terrorism

From Sin to Disease Jonathan K. Okinaga, 2022-09-23 Since Benjamin Rush first introduced the disease of wills as the cause of alcoholism a steady and slow infiltration of the disease model has infected how the church treats those who struggle with addictions The first organization that truly sought to remove the soul care of addicts from the church was Alcoholics Anonymous AA through their bestselling The Big Book of AA and the introduction of the 12 Steps AA s influence on how the church confronts addiction still reverberates today with many of the ministries that address addiction firmly rooted in what can be found in AA literature Addictions were once viewed as an issue caused by sin and best addressed through faith and prayer Currently addiction is seen through the lens of disease The ramifications are consequential as more church members are struggling with addictions than ever before Tracing the progression of addiction from sin to disease will reveal that the SBC and its churches have been negligent in understanding the underlying foundations of AA and the influence that the medicalization of substance abuse has had on how churches approach what should be classified as a sin issue
