Methodological Approaches in Kurdish Studies Bahar Baser, Yasin Duman, Mari Toivanen, Begum Zorlu, 2018-11-06 This edited volume presents thirteen contributions that reflect upon the practical ethical theoretical and methodological challenges that researchers face when conducting fieldwork in settings that are characterized with deteriorating security situations increasing state control and conflicting inter ethnic relations More precisely they shed light to the intricacies of conducting fieldwork on highly politicized and sensitive topics in the region of Kurdistan in Iraq Syria and Turkey as well as among Kurdish diaspora members in Europe This volume is multidisciplinary in its focus and approach It includes contributions from scholars from various disciplinary backgrounds ranging from sociology and political science to social psychology and anthropology The complexity of security situations and the atmospheres of distrust and suspicion have led the contributors to be creative and to adapt their research methods in ways that at times transcend disciplinary boundaries and conventions Relatedly the contributions also open the often considered Pandora's box of discussing the failures in what is often a messy research field and how to adopt one's methods to rapidly changing political circumstances This necessitates greater reflexivity in existing power relations of the surrounding context and how those affect not only the interaction situations between the researcher and the participants but also raise questions for the overall research process concerning namely social justice representation and knowledge production The contributions unravel this by unpacking positionalities beyond ethnicities discussing how

gendered and other positionalities are constructed in fieldwork interactions and by illustrating how the surrounding structures of power and dominance are present in every day fieldwork What differentiates this book from the existing literature is that it is the first academic endeavor that solely focuses on methodological reflections aimed to the field of Kurdish Studies It offers a comprehensive and multidisciplinary account of scholars fieldwork experiences in the Kurdish regions and as such it is also of value to scholars conducting or about to conduct fieldwork in conflict regions elsewhere

German Rocketeers in the Heart of Dixie Monique Laney, 2015-01-01 This thought provoking study by historian Monique Laney focuses on the U S government assisted integration of German rocket specialists and their families into a small southern community at the end of World War II In 1950 Wernher von Braun and his team of rocket experts relocated to Huntsville Alabama a town that would celebrate the team despite their essential role in the Nazi war effort a decade earlier for their contributions to the U S Army missile program and later to NASA s space program Based on oral histories provided by members of the African American and Jewish communities the rocketeers families and co workers friends and neighbors Laney s book demonstrates how the histories of German Nazism and Jim Crow in the American South intertwine in narratives about the past This is a critical reassessment of a singular time that links the Cold War the Space Race and the Civil Rights era while addressing important issues of transnational science and technology and asking Americans to consider their country s own history of racism when reflecting on the Nazi past
