## **South Africa Pushed To The Limit The Political Economy Of Change:**

**South Africa Pushed to the Limit** Hein Marais,2013-07-04 Since 1994 the democratic government in South Africa has worked hard at improving the lives of the black majority yet close to half the population lives in poverty jobs are scarce and the country is more unequal than ever For millions the colour of people's skin still decides their destiny In his wide ranging incisive and provocative analysis Hein Marais shows that although the legacies of apartheid and colonialism weigh heavy many of the strategic choices made since the early 1990s have compounded those handicaps Marais explains why those choices were made where they went awry and why South Africa's vaunted formations of the left old and new have failed to prevent or alter them From the real reasons behind President Jacob Zuma's rise and the purging of his predecessor Thabo Mbeki to a devastating critique of the country's continuing AIDS crisis its economic path and its approach to the rights and entitlements of citizens South Africa Pushed to the Limit presents a riveting benchmark analysis of the incomplete journey beyond apartheid **Political Economy of Post-apartheid South Africa** Vusi Gumedze,2015-12-29 The book made up of three parts covers a wide spectrum of political economy issues on post apartheid South Africa Although the text is mainly descriptive to explain various areas of the political economy of post apartheid South Africa the first and the last parts provide illuminating insights on the kind of society that is emerging during the twenty one years of democracy in the country The book discusses important aspects of the political history of apartheid South Africa and the evolution of post apartheid society including an important recap of the history of southern Africa before colonialism The text is a comprehensive description of numerous political economy phenomena since South Africa gained its political independence and covers some important themes that have not been discussed in detail in other publications on post apartheid South Africa The book also updates earlier work of the author on policy and law making land and agriculture education and training as well as on poverty and inequality in post apartheid South Africa thereby providing a wide ranging overview of the socio economic development approaches followed by the successive post apartheid administrations Interestingly three chapters focus on various aspects of the post apartheid South African economy economic policies economic empowerment and industrial development Through the lens of the notion of democratic developmental state and taking apartheid colonialism as a point of departure the book suggests that so far post apartheid South Africa has mixed socio economic progress The authors extensive experience in the South African government ensures that the book has policy relevance while it is also theoretically sound The text is useful for anyone who wants to understand the totality of the policies and legislation as well as the political economy interventions pursued since 1994 by the South African Government **Development Planning in South Africa** John Reynolds,2018-06-15 Celebrated as a beacon of democracy and reconciliation many people in South Africa continue to live in severe poverty particularly in the Eastern Cape Province Backed by the United Nations Development Programme the Eastern Cape's provincial government consequently launched an historically ambitious programme the Provincial Growth and

Development Plan aimed at tackling the province's poverty unemployment and inequality over a ten year period in a radical policy overhaul Drawing on the author's first hand engagement with the planning process Development Planning in South Africa is an empirically rich study that utilises a strategic relational approach to explore the ways in which this unprecedented challenge was negotiated and eventually undermined by the South African state The first work of its kind the book provides an indispensable micro level study with profound implications for how state power is understood to be organised and expressed in state policy Relevant beyond South Africa to policy implementation in both developing and developed states globally the book is essential reading for students and scholars of government studies political economy development policy studies and social movements

Thabo Mbeki Adekeye Adebajo,2017-05-15 Former South African president Thabo Mbeki is a complex figure He was a committed young Marxist who while in power embraced conservative economic policies and protected white corporate interests a rational and dispassionate thinker who was particularly sensitive to criticism and dissent and a champion of African self reliance who relied excessively on foreign capital As a key liberation leader in exile he was instrumental in the ANC's antiapartheid struggle Later he helped build one of the world's most respected constitutional democracies As president though he was unable to overcome inherited socioeconomic challenges and his disastrous AIDS policies will remain a major blotch on his legacy Mbeki is the most important African political figure of his generation He will be remembered as a foreign policy president for his peacemaking efforts and his role in building continental institutions not least of which was the African Union In this concise biography ideally suited for the classroom Adekeye Adebajo seeks to illuminate Mbeki's contradictions and situate him in a pan African pantheon

Extractive Industries and Changing State Dynamics in Africa Jon Schubert,Ulf Engel,Elísio Macamo,2018-07-04 This book uses extractive industry projects in Africa to explore how political authority and the nation state are reconfigured at the intersection of national political contestations and global transnational capital Instead of focusing on technological zones and the new social assemblages at the actual sites of construction or mineral extraction the authors use extractive industry projects as a topical lens to investigate contemporary processes of state making at the state corporation nexus Throughout the book the authors seek to understand how public political actors and private actors of liberal capitalism negotiate and redefine notions and practices of sovereignty by setting legal regulatory and fiscal standards Rather than looking at resource governance from a normative perspective the authors look at how these negotiations are shaped by and reshape the self conception of various national and transnational actors and how these jointly redefine the role of the state in managing these processes for the greater good Extractive Industries and Changing State Dynamics in Africa will be useful for researchers upper level students and policy makers who are interested in new articulations of state making and politics in Africa

**Policy, Politics and Poverty in South Africa** Jeremy Seekings,Nicoli Nattrass,Kasper,2015-07-21 Seekings and Nattrass explain why poverty persisted in South Africa after the transition to democracy in 1994 The book examines how

public policies both mitigated and reproduced poverty and explains how and why these policies were adopted The analysis offers lessons for the study of poverty elsewhere in the world *The Climate Crisis* Vishwas Satgar,2018-02-01 Essays that address the question how can people and class agency change this destructive course of history Capitalism s addiction to fossil fuels is heating our planet at a pace and scale never before experienced Extreme weather patterns rising sea levels and accelerating feedback loops are a commonplace feature of our lives The number of environmental refugees is increasing and several island states and low lying countries are becoming vulnerable Corporate induced climate change has set us on an ecocidal path of species extinction Governments and their international platforms such as the Paris Climate Agreement deliver too little too late Most states including South Africa continue on their carbon intensive energy paths with devastating results Political leaders across the world are failing to provide systemic solutions to the climate crisis This is the context in which we must ask ourselves how can people and class agency change this destructive course of history Volume three in the Democratic Marxism series *The Climate Crisis* investigates eco socialist alternatives that are emerging It presents the thinking of leading climate justice activists campaigners and social movements advancing systemic alternatives and developing bottom up just transitions to sustain life Through a combination of theoretical and empirical work the authors collectively examine the challenges and opportunities inherent in the current moment This volume builds on the class struggle focus of Volume 2 by placing ecological issues at the centre of democratic Marxism Most importantly it explores ways to renew historical socialism with democratic eco socialist alternatives to meet current challenges in South Africa and the world *South Africa* Hein Marais,1998 This book explains the reasons why the ANC now that it is in power has resisted calls for more radical options and instead pursued quite conservative economic management policies

*International Journal of Labour Research* International Labor Office,International Labour Office,2014 The International Journal of Labour Research provides an overview of recent research on labor and social policies from trade union researchers and academics around the world The journal is multidisciplinary and of interest to trade union researchers labor ministries and academics in all the relevant disciplines worldwide industrial relations sociology law economics and political science A consequence of the recent financial crisis and its aftermath has been increased attention to the issue of inequality both as one of the underlying causes of the crisis itself and as a problem that now threatens social cohesion the world over This issue of the Journal examines both dimensions of the problem and seeks to provide strategic perspectives to trade unions as they go about combatting inequalities

*Confronting Finance* Nicolas Pons-Vignon,Phumzile Ncube,2012 The unfolding economic crisis has unequivocally proved that neoliberal policies were no better for growth than for social progress As poverty and inequality are rising to alarming levels in Europe the old continent seems at a loss to respond Political leaders seem content to liquidate the social gains made by workers struggles A small minority possibly even smaller than 1 per cent associated with the financial sector stands to benefit from a deepening of neoliberalism This new anthology of essays from the Global Labour

Column explores Europe's turmoil and challenges the deep rooted consequences of neoliberalism in the North and the South. It sheds light on new movements and ideas which are emerging to defend and mobilise workers and points to encouraging new policies and directions which could lay the foundations of a new order that would put decent work and life at its core. A number of these come from the South from which the North may have much to learn. ILO website **Just Transitions** Mark Swilling, Eve Annecke, 2012. Current economic growth strategies around the world are rapidly depleting natural resources and eco systems. Just Transitions provides an overview of these challenges from a Global South perspective. How do developing countries eradicate poverty via economic development while encountering the consequences of global warming and dwindling supplies of clean water, productive soils, cheap oil, minerals and other resources? How do they address widening inequalities as well as the need to rebuild ecosystem services and natural resources? This book considers a just transition which reconciles the sustainable use of natural resources with a pervasive commitment to sufficiency where over consumers are satisfied with less so that under consumers can secure enough. It synthesises a range of different literatures to illuminate new ways of thinking from a sustainability perspective. It rethinks development with special reference to the greening of the developmental state. It explores the key role that cities could play in the transition to a more sustainably urbanised world, highlights the neglect of soils and examines the potential of sustainable agriculture to feed the world. Case studies drawn from Africa detail the challenges but they are set in the context of global trends. The authors conclude with their experience of building a community that aspires to live sustainably.

**Mandela** Alexander Johnston, 2019-12-12. This outstanding and original work goes to the heart of South Africa's political problems. Doubts as to the sustainability of the post-apartheid settlement, beset with divisions in the ruling ANC, factionalism, corruption and the widening of fault lines in state and society. The leadership issue has become key and this will be the first specific examination of leadership in the light of Mandela's legacy and its effect on his successor as potential and actual leaders all in the shadow of Mandela as the architect of the transition from apartheid to democracy and with overarching moral authority and international reputation. Alexander Johnston shows how his successors are judged against Mandela's achievements including the potentially impressive lost leaders and concentrating on his immediate successors Thabo Mbeki and Jacob Zuma. The book concludes with an in-depth assessment of new president Cyril Ramaphosa's potential to be a leader for a new dawn. This is an objective and critical work by a close observer who acknowledges the achievement of South African leadership but is acutely aware of the doubts as to the sustainability of South Africa's hard-won democratic settlement. An essential read for all readers interested in leadership and in the traumatic history and future of Africa's leading state as the continent rises to global importance.
