Joly, Charles Davis, 2022-11-15     Management of Technological Innovation in Developing and Developed Countries HongYi Sun, 2012-03-21 It is widely accepted that technology is one of the forces driving economic growth. Although more and more new technologies have emerged, various evidence shows that their performances were not as high as expected. In both academia and practice, there are still many questions about what technologies to adopt and how to manage these technologies. The 15 articles in this book aim to look into these questions. There are quite many features in this book. Firstly, the articles are from both developed countries and developing countries in Asia, Africa, and South and Middle America. Secondly, the articles cover a wide range of industries including telecommunication, sanitation, healthcare, entertainment, education, manufacturing, and financial. Thirdly, the analytical approaches are multi-disciplinary, ranging from mathematical, economic, analytical, empirical, and strategic. Finally, the articles study both public and private organizations, including the service industry, manufacturing industry, and governmental organizations. Given its wide coverage and multi-disciplines, the book may be useful for both academic research and practical management.     *Desktop Video Studio Bible* George Avgerakis, 2003 Aspiring filmmakers will be able to develop their own desktop video studio by using this guide, which covers equipment, technology, budgets, contracts, and day-to-day operations. Audio and video recordings of faculty recitals, student recitals, ensembles, and guest artists provide a unique record of musical life in an academic environment. Libraries have often been responsible for describing, preserving, and providing access to these valuable collections. *Managing Institutional Recordings* brings together a variety of articles on different aspects of collecting and managing institutional recording collections. This compilation of essays and case studies, written by known experts in the field, explores solutions to managing collections in a variety of institutions across North America. Topics include planning, managing, cataloging, preservation, and legal aspects of collections. As a unique exploration of the topic, *Managing Institutional Recordings* will provide readers with resources and guidance on their own institutional recording collections.     Electronic Musician, 2007
