South Asia's Weak States T. V. Paul, 2010-08-09 South Asia which consists of eight states of different sizes and capabilities is characterized by high levels of insecurity at the inter state intra state and human level insecurity that is manifest in both traditional and non traditional security problems especially transnational terrorism fuelled by militant religious ideologies To explain what has caused and contributed to the perpetual insecurity and human suffering in the region this book engages scholars of international relations comparative politics historical sociology and economic development among others to reveal and analyze the key underlying and proximate drivers It argues that the problems are driven largely by two critical variables the presence of weak states and weak cooperative interstate norms Based on this analysis and the conclusions drawn the book recommends specific policies for making the region secure and for developing the long lasting inter and intra state cooperative mechanisms necessary for the perpetuation of that security Public Security in the Negotiated State Markus-Michael Müller, 2011-11-24 Policing and security governance in areas of limited statehood have become central issues in contemporary academic and political debates This book offers an in depth study on public security provision the resulting state society relations and policing in Mexico City *Small States and International Security* Clive Archer, Alyson Bailes, Anders Wivel, 2014-03-14 This book explains what small states are and explores their current security challenges in general terms and through specific examples It reflects the shift from traditional security definitions emphasizing defence and armaments to new security concerns such as economic societal and environmental security where institutional cooperation looms larger These complex issues linked with traditional power relations and new types of actors need to be tackled with due regard to democracy and good governance Key policy challenges for small states are examined and applied in the regional case studies The book deals mainly with the current experience and recent past of such states but also offers insights for their future policies Although many of the states covered are European the study also includes African Caribbean and Asian small states Their particular interest and relevance is outlined as is the connection between their security challenges and their smallness Policy lessons for other states are then sought The book is the first in depth multi continent study of security as an aspect of small state governance today It is novel in placing the security dilemmas of small states in the context of wider ideas on international and institutional change and in dealing with non European states and regions *Balochistan and the Mélange of Violence* Seema Khan, 2023-11-10 This book presents a comprehensive analysis of the intricate security situation prevailing in Balochistan It explores and establishes correlations between the internal structural vulnerabilities and fault lines of the Pakistani state with the external influences exerted on the region Employing a rigorous examination of both primary and secondary data the volume critically examines the multifaceted nature of organised violence in Balochistan In addition to separatist movements the presence of religious militancy and cross border terrorism is thoroughly examined The book delves into the external involvement of regional and

global powers in the intricate tapestry of violence within Balochistan thereby shedding light on the emerging geopolitical landscape and the corresponding power dynamics in the region It also analyses how the implementation of largescale developmental initiatives particularly facilitated by China under the auspices of the China Pakistan Economic Corridor CPEC has elevated the geostrategic significance of Balochistan while simultaneously entangling it in the vortex of regional power politics This volume will be of interest to scholars and researchers specializing in geopolitics International Relations and South Asian studies

Trinkunas, Anders Wivel, Ralf Emmers, 2021 Abstract With the rapid rise of China and the relative decline of the United States the topic of power transition conflicts is back in popular and scholarly attention The discipline of International Relations offers much on why violent power transition conflicts occur yet very few substantive treatments exist on why and how peaceful changes happen in world politics This Handbook is the first comprehensive treatment of the subject of peaceful change in International Relations It contains some 41 chapters all written by scholars from different theoretical and conceptual backgrounds examining the multi faceted dimensions of this subject In the first part key conceptual and definitional clarifications are offered and in the second part papers address the historical origins of peaceful change as an International Relations subject matter during the Inter War Cold War and Post Cold War eras In the third part each of the IR theoretical traditions and paradigms in particular Realism liberalism constructivism and critical perspectives and their distinct views on peaceful change are analyzed In the fourth part papers tackle the key material ideational and social sources of change In the fifth part the papers explore selected great and middle powers and their foreign policy contributions to peaceful change realizing that many of these states have violent past or tend not to pursue peaceful policies consistently In part six the contributors

Kacowicz, 2018-11-09. This volume provides a unique open inter-disciplinary dialogue across the Humanities and Social Sciences to further our understanding of the phenomenon of regions and regionalism in a globalized world both at the theoretical and empirical levels. What comprises a region? What are the different regional dynamic processes that take place? What is the relationship between the regional and the global? What role does identity building play? Bringing together scholars from various disciplines within and across the Social Sciences and the Humanities to reflect on these questions, the book explores how regions are imagined, constructed, understood, and explained in different academic disciplines. Each chapter addresses these common questions and uses its own disciplinary lenses to answer them. In addition, the volume offers interesting reflections on the academic borders constructed in the study of regions, thus demonstrating the importance of obtaining insights from both social scientists and humanities scholars in order to better understand the relevance of regions in a complex and globalized world. An important work for scholars and postgraduate students in many fields including political science, international relations, sociology, economics, geography, history, and literature, as well as for those interested in regionalism and area studies. **Deconstructing India-Pakistan Relations** Sanjeev Kumar H. M., 2023-12-14. This book examines the complex dynamics of India-Pakistan relations by situating the same in the postcolonial setting of the subcontinent. In pursuit of this, the book analyses the impact of the linkages between the postcolonial processes of state-making and the structuring of political communities upon the evolution of the problematique of state security in South Asia. For the purpose of undertaking this task, the author deconstructs the countries' colonial history with an aim to map its impact on the making of the foreign policy of Pakistan. Drawing primarily from colonial discourse theory and historical sociology, the book links the trajectory of Pakistan's international politics to its domestic politics and weak state inheritances. By doing this, it offers a stimulating treatment of the history of the country's troubled postcolonial relations with India. This has been done in the book by presenting the modes by which the religio-military and politico-bureaucratic classes that constitute the power elite in Pakistan tended to have moulded an India-centred State security problematique. This book will be of interest to researchers studying South Asian security, India-Pakistan relations, and the defence and foreign policy of Pakistan. **Writing Southeast Asian Security** Jennifer Mustapha, 2019-01-10. This book is a critical analysis of how the discursive and material practices of the War on Terror influenced security politics in Southeast Asia after 9/11. Building on the author's own critical security studies approach, which demands a historically and

geographically contingent method of empirically grounded critique Writing Southeast Asian Security examines some of the unexpected effects that the discourses and practices of the War on Terror have had on the production of insecurity in the region The cases presented here demonstrate that forms of insecurity were constructed and or abetted by the War on Terror itself and often occurred in concert with the practices of traditional state centric security This work thus contributes to a larger critical project of revealing the violence intrinsic to the pursuit of security by states but also demonstrates pragmatic opportunities for a functioning politics of theorizing security This book will be of much interest to students of critical terrorism studies critical security studies East Asian and Southeast Asian politics US foreign policy and IR in general
