Artificial Intelligence in Cutaneous Lesions: Where do we Stand and What is Next?

Mara Giavina-Bianchi, Justin Ko, 2024-05-16 There has been a growing amount of research detailing the use of Artificial Intelligence AI in cutaneous diseases. Nonetheless, we still do not have a regulatory agency approved app or computer system being used by dermatologists or other physicians that could be confronted with challenging skin lesions in daily practice. Why is this? Where do we stand now? What is next in this field? It is time to deeply explore this theme.

Postinternet Art and Its Afterlives Ian Rothwell, 2023-12-19 Focusing on the postinternet art of the 2010s, this volume explores the widespread impact of recent internet culture on the formal and conceptual concerns of contemporary art. The postinternet art movement is splintered and loosely defined both in terms of its form and its politics and has come under significant critique for this reason. This study will provide this definition, offering a much-needed critical context for this period of artistic activity that has had and is still having a major impact on contemporary culture. The book presents a picture of what the art and culture made within and against the constraints of the online experience look, sound, and feel like. It includes works by Petra Cortright, Jon Rafman, Jordan Wolfson, DIS, Amalia Ulman, and Thomas Ruff, and presents new analyses of case studies drawn from the online worlds of the 2010s, including vaporwave, anonymous image board culture, irony bros, and edgelords, viral extreme sports stunts, and GIFs. The book will be of interest to scholars working in art history, contemporary art, and digital culture.
