Apple Watch Ideas Returns:

Return on Ideas David Nichols, 2008-05-23 *Return on Ideas* is a practical guide to getting more from the resources you put into your innovation process. David Nichols clearly shows why current innovation funnel models stifle rather than encourage new ideas and offers a new methodology rocketing to tackle the problem. The first book to look in detail at innovation as a business driving imperative. *Return on Ideas* provides the tools, techniques and processes to actually upgrade the way you tackle innovation, illustrated with examples from innovative companies such as Yo, Sushi, Apple, Vodafone, Unilever, P G, Danone, Amex and Ben & Jerry's, as well as unconventional sources such as theatre and comedy.

Homeschooling Ginny Yurich, MEd, 2025-05-27 During the past five years, homeschooling rates have been on the rise and show no signs of slowing. But many parents lack confidence, questioning whether they are doing it right or whether they should take the plunge at all. With so many voices offering conflicting advice, it's hard to know where to start and where to go from there. A homeschooling mother of five and founder of 1000 Hours Outside, Ginny Yurich draws from her years of experience and research, as well as her master's degree in education from the University of Michigan, to encourage and equip parents who want to give homeschooling a try or want to improve their experience. Starting from the standpoint of you're doing it right instead of you're doing it wrong, Ginny helps parents understand that just by choosing to homeschool, they are learning through living, allowing for individual timelines, leaving space for boredom, providing multi-age experiences, teaching self-reliance, offering freedom, slowing down, and more. If you've been on the fence about homeschooling or wondering if you're doing it all wrong, let Ginny encourage you in all you've already accomplished and equip you for even greater things ahead.

Optionality is the right but not the obligation to take an action. Built on historic military tactics, static engineering principles and equilibrium seeking economics.

conventional strategic thinking suffers some weaknesses principal of which is its inability to deal with conditions of high uncertainty This book begins by dividing the business landscape into three distinct domains 1 Fragile 2 Robust and 3 Long shot FRL which alert us to the context specificity of strategy tools before suggesting that theoretical lenses are required to understand and implement strategy in VUCA Volatile Uncertain Complex and Ambiguous domains The authors explore the concept and methodology of Optionality in order to demonstrate how it can be used in conjunction with existing strategy tools in order to achieve competitive success It will be of great interest to academics and students of strategy and innovation
