**How Executives Should Think About AI** Stephen J. Andriole, 2025-09-30 Much of what is said about AI is misleading or just plain wrong. It's also sometimes intended to frighten everyone about a future that's unlikely to occur. Think Bill Gates, Elon Musk, Steve Wozniak, and Geoffrey Hinton among others. AI will not steal children, hold hostages for bitcoins, or start nuclear wars. But it will fundamentally change business through the intelligent automation of many routine and nonroutine tasks that companies perform all the time. Old business models will die as fast as new ones emerge. Whole industries will be reengineered, reinvented, and reimagined. Some will be displaced altogether. Some industries will be disrupted in every sense of the word in just three to five years. In fact, it's already begun. **How Executives Should Think About AI: Straight Talk About the Inevitable** prepares executives for the AI future. It's not a complicated treatise on AI or a theoretical look at how new technology can transform business models and processes. It's a series of conversations masquerading as chapters designed to help executives quickly understand AI: what it can do and what they should do about AI, machine learning, ML, and generative AI, GenAI, right now. These conversations about AI are intended to get executives up to speed on AI, ML, and GenAI so that they become AI comfortable in many ways, including launching a steady stream of demonstration prototypes to help their companies explore AI's capabilities and potential benefits. These timely conversations can help executives understand how AI will impact their companies and their professional success. It's straight talk about the most important technology since the Internet. Executives have no choice but to embrace AI to accomplish their professional goals. This book helps accomplish these goals. It helps them make decisions about what AI can and cannot do for their companies.

### **Enablers, Barriers, and Challenges for Inclusive Curriculum**

**Charamba, Erasmus, Ndhlovana, Shalom Nokuthula**, 2025-05-29 United Nations 2030 Agenda for Sustainable Development Goal 4 seeks to ensure inclusive and equitable quality education and to promote lifelong learning opportunities for all learners. Education can only unfold its full potential to transform our world if it is approached from a lifelong learning perspective. In this way, learners' lives are brought closer to education through integrated multi-sectoral approaches that draw the focus from supply to demand. In order to achieve this, institutions and educators need to come up with strategies that are inclusive regardless of the student's intellectual challenges, physical stature, gender, language, culture, or mode of learning. **Enablers, Barriers, and Challenges for Inclusive Curriculum** examines the impact of enablers and barriers on education for students and teachers. It discusses promoting inclusive curriculum in face-to-face, online, and blended learning environments. Covering topics such as educational transitions, large classrooms, and school-going young mothers, this book is an excellent resource for educators, student teachers, parents, policymakers, professionals, researchers, scholars, academicians, and more.

[An Intelligent Video Editing Automate Framework Using AI and Computer Vision](#) Haolin Xie, Yu Sun, 2022 At present many video editing software have been created but what they all have in common is that they require manual work to edit. And it takes a lot of time and the user needs to watch each frame before editing. In this paper we have developed a program about AI intelligence. The most important point of this software is that it can automatically focus the face of a person and edit only selected clips of the person to make a complete video. Users only need to prepare the video they want to edit and a photo of the main character. Then upload both to the software and AI Intelligence will automatically edit it providing the user with a way to download and save it after editing the main character. They need we applied our application to an example video using the Marvel character Hawkeye as he appears in End Game and tried many experiments with the clip. Eventually we tried many experiments with the clip and finally got a video of our selected character. The results show that this software saves the user a lot of time and is highly efficient. All operations are carried out by AI.
