Raffael Buff,2016-12 Streaming problems are algorithmic problems that are mainly characterized by their massive input streams Because of these data streams the algorithms for these problems are forced to be space efficient as the input stream length generally exceeds the available storage The goal of this study is to analyze the impact of additional information more specifically a hypothesis of the solution on the algorithmic space complexities of several streaming problems To this end different streaming problems are analyzed and compared The two problems most frequent item and number of distinct items with many configurations of different result accuracies and probabilities are deeply studied Both lower and upper bounds for the space and time complexity for deterministic and probabilistic environments are analyzed with respect to possible improvements due to additional information The general solution search problem is compared to the decision problem where a solution hypothesis has to be satisfied **Computational Logistics** Joachim R. its future potential The approach adopted is comprehensive covering topics notably the scalability and fault tolerance issues that previously have not been treated in depth Provides an accessible introduction to the technology presenting the basic principles for media streaming system design focusing on the need for the correct and timely delivery of data Explores the use of parallel server architectures to tackle the two key challenges of scalability and fault tolerance Investigates the use of network multicast streaming algorithms to further increase the scalability of very large scale media streaming systems Illustrates all findings using real world examples and case studies gleaned from cutting edge worldwide research Combining theory and practice this book will appeal to industry specialists working in content distribution in general and continuous media streaming in particular The introductory materials and basic building blocks complemented by amply illustrated more advanced coverage provide essential reading for senior undergraduates postgraduates and researchers in these fields
