Perry,2024-01-25 Your guide to grow and flourish as a science teacher The past two decades have seen a paradigm shift in science education thanks in large part to the Next Generation Science Standards NGSS which advocate a move away from procedural lab investigations and direct instruction and toward increased emphasis on reasoning sensemaking phenomena exploration problem solving and collaboration Under this new paradigm students are learning real science as scientists practice it so that more and more students are actively investigating questions and pursuing solutions of their own making As part of the Five to Thrive series for early career educators this comprehensive guide provides those who are new to teaching science as well as seasoned teachers looking to enhance their practice the fundamentals to develop best teaching practices that reflect their students experiences and requirements Written by experienced science educators Answers to Your Biggest Questions About Teaching Secondary Science provides practical guidance on successful strategies and techniques for teaching science in a way that gives every student the opportunity to learn grow and achieve at high levels while providing opportunities to develop their agency and authority in the classroom ultimately resulting in a positive science identity The book is organized around five overarching questions and answers that will help you most thrive in your secondary science classroom How do I build a positive science community How do I structure organize and manage my science class How do I engage my students in science How do I help my students talk about science How do I know what my students know and how can I use that information to plan and move them forward The book concludes with a sixth question Where do I go from here that provides guidance for growing your practice over time including discussions on self care advocating for students and an extensive discussion on growing your professional network Woven throughout you ll find helpful sidebar notes on fostering identity and agency access and equity teaching in different settings and invaluable resources for deeper learning Strive to become the best science educator you can be your students are counting on it American Journal of Physics ,2001

Sticky Tape , Sticky Tape is a physics experiment that demonstrates how like static charges repel and opposite static charges attract This activity is suitable for use with various grade levels and can be performed by students individually or in a classroom setting The Physics Department at Colorado State University in Fort Collins provides this lesson online as part of its Little Shop of Physics outreach program String and Sticky Tape Experiments R. D. Edge,1987 String and Sticky Tape Experiments brings together a host of experiments demonstrating fundamental physics laws in a practical way that students can work with on their own Materials are deliberately chosen for their simplicity availability and low cost so they can be done at home as well as at school Many of these experiments were published in the American Association of Physics Teachers s

instructional book on how to use readily available materials to turn the house into a science lab Physics teacher Bobby
Mercer provides readers with more than 50 great hands on experiments that can be performed for just pennies or less Turn a
plastic cup into a pinhole camera using waxed paper a rubber band and a thumbtack Build a swinging wave machine using a
series of washers suspended on strings from a yardstick Or construct your own planetarium from an empty potato chip
canister construction paper scissors and a pin Each project has a materials list detailed step by step instructions with
illustrations and a brief explanation of the scientific principle being demonstrated Junk Drawer Physics also includes sidebars
of fascinating physics facts such as did you know the Eiffel Tower is six inches taller in summer than in winter because its
steel structure expands in the heat Educators and parents will find this title a handy resource to teach children about physics
topics that include magnetism electricity force motion light energy sound and more and have fun at the same time
