Your Guide to Get Into Medical School Aly Madhavji, Jiayi Hu, Manveen Puri, Sameer Masood, 2016-07-30 It is commonly known that the application process to medical school is competitive. From our experience about 1% of students who express an interest in becoming a physician during their first year of undergraduate studies eventually matriculate into medical school. While pursuing a career in medicine remains a dream for many and is considered the endpoint of a journey many different paths can lead towards that destination. Given the significant time commitment required for a successful application the decision to pursue medicine is one of the biggest decisions many high school and undergraduate students face. However many applicants do not look beyond gaining the coveted admission letter and are then left with an incomplete understanding of what medical school entails and the diverse career paths they can take after obtaining their MD. One of the primary reasons for this is that despite significant progress made in recent years medicine remains a closed door career. A large proportion of students in our medical class had at least one immediate relative within the profession which is also reflected in the literature. The barriers created by such exclusivity make it difficult for those who have not been socialized into the profession from a young age to navigate the unspoken pitfalls of the admissions process. This book attempts to break down some of those barriers. It focuses on every component of the medical school application process. It differs from the many other books written on this subject by taking an experiential approach. We believe that the best way to learn about medical school acceptance is to garner advice from those who have recently achieved that milestone as well as from individuals in related professions who can provide valuable insights. This guide is divided into ten chapters each of them covering an important step along a premed's journey. While this book has a focus on North America we have written this guide with a global audience in mind as many of the concepts discussed are relevant to any medical school application process. As such although the key components of the application process to medical school remain the same across various training systems not every chapter will be equally relevant to every reader. Typically an application is composed of academic performance, volunteer activities, research projects, medical college admission test performance and extracurricular activities. We have combined the prescriptive style of most books of this type with detailed stories of how real people navigated their personal journeys to reach successful outcomes. This guide shares a broad range of perspectives on what it takes and means to be a physician. We are more convinced than ever that amongst applicants who have the academic credentials those who seek mentors and network early within the profession be it through family or friend circles and those who learn from their mistakes are accepted earlier. This book will help you in that journey towards medical school acceptance and an exciting career in medicine. Jiayi Hu MD, Manveen Puri MD, CCFP, Sameer Masood MD, Aly Madhavji CPA CA CMA CIM. *Mixed Reality and Gamification for Cultural Heritage* Marinos Ioannides, Nadia Magnenat-Thalmann, George Papagiannakis, 2017-04-26 This volume on virtual and augmented reality VR AR and gamification for cultural heritage offers an insightful introduction to the

theories development recent applications and trends of the enabling technologies for mixed reality and gamified interaction in cultural heritage and creative industries in general. It has two main goals serving as an introductory textbook to train beginning and experienced researchers in the field of interactive digital cultural heritage and offering a novel platform for researchers in and across the culturally related disciplines. To this end it is divided into two sections following a pedagogical model developed by the focus group of the first EU Marie S Curie Fellowship Initial Training Network on Digital Cultural Heritage ITN DCH. Section I describes recent advances in mixed reality enabling technologies while section II presents the latest findings on interaction with 3D tangible and intangible digital cultural heritage. The sections include selected contributions from some of the most respected scholars researchers and professionals in the fields of VR AR gamification and digital heritage. This book is intended for all heritage professionals researchers lecturers and students who wish to explore the latest mixed reality and gamification technologies in the context of cultural heritage and creative industries. It pursues a pedagogic approach based on trainings conferences workshops and summer schools that the ITN DCH fellows have been following in order to learn how to design next generation virtual heritage applications systems and services. **Buyers**

Beware Patricia Joan Saunders, 2022-05-13 **Buyers** Beware treats Caribbean pop cultural texts with the same critical attention as dominant mass cultural representations of the region to read them against the grain and consider how and whether their pulp preoccupation with contemporary fashion music sex fast food and television is instructive for how race class gender sexuality and national politics are disseminated and consumed within the Caribbean. **Oil Culture** Ross Barrett, Daniel Worden, 2014-10-15 In the 150 years since the birth of the petroleum industry oil has saturated our culture fueling our cars and wars our economy and policies. But just as thoroughly culture saturates oil So what exactly is oil culture? This book pursues an answer through petroculture's history in literature film fine art wartime propaganda and museum displays. Investigating cultural discourses that have taken shape around oil these essays compose the first sustained attempt to understand how petroleum has suffused the Western imagination. The contributors to this volume examine the oil culture nexus beginning with the whale oil culture it replaced and analyzing literature and films such as *Giant* *Sundown* *Bernardo Bertolucci's La Via del Petrolio* and *Ben Okri's What the Tapster Saw* corporate art museum installations and contemporary photography and in apocalyptic visions of environmental disaster and science fiction. By considering oil as both a natural resource and a trope the authors show how oil's dominance is part of culture rather than an economic or physical necessity. Oil Culture sees beyond oil capitalism to alternative modes of energy production and consumption.
