book summarizes the findings in the fields of general education and psychology as they relate to vision loss. It is concerned primarily with providing understanding of the many elements that must be considered before a successful rehabilitative and or an educational program can be developed. This type of understanding is illustrated in the book by examples drawn from experience that the authors have directly observed. Theoretical factors are described that must be considered in the development of a suitable program for a person with specific strengths and weaknesses. Discussions are also included that relate to the meaning and implications of self concept and self esteem in the overall adjustment of individuals with vision loss. Also psychological and sociological theories are evaluated of the blind as described in writings such as Kim's *The Community of the Blind* and Scott's *The Making of a Blind Man* in terms of their relevance of life adjustment. Weaknesses are identified in the research bases in this field and propose specific research activities that could help alleviate problems. Another focus is on provision of explanations of the origin development influence and modification of public attitudes toward blindness and the influence of these attitudes on the adjustment of individuals with blindness. It will be of interest not only to educators and rehabilitation specialists in the field of work for the blind but also to psychologists social workers educators and therapists.

Low Vision Assessment Jane Macnaughton (MCOptom.), 2005 *Eye Essentials* is a major new series which provides authoritative and accessible information for all eye care professionals whether in training or in practice. Visual Impairment and Blindness Giuseppe Lo Giudice, Angel Catala, 2020-09-09. Blindness and vision impairment affect at least 2.2 billion people worldwide with most individuals having a preventable vision impairment. The majority of people with vision impairment are older than 50 years, however vision loss can affect people of all ages. Reduced eyesight can have major and long lasting effects on all aspects of life including daily personal activities, interacting with the community, school and work opportunities and the ability to access public services. This book provides an overview of the effects of blindness and visual impairment in the context of the most common causes of blindness in older adults as well as children including retinal disorders, cataracts, glaucoma and macular or corneal degeneration.
