**Liabilities and Modern Artificial Intelligence** Estelle Wallingford,2025-09-09 This book addresses how private law liability should be assigned in contexts where modern forms of AI are deployed AI as a technology holds the potential to radically improve global society yet the pace of its advancement far outstrips the pace at which legal systems are responding This book explores legal approaches to AI how AI

should be legally characterised and proposes an overarching theoretical liability framework termed the Tri Phase AI Liability Model. This framework is flexible in nature and considers the type of AI the context in which it is deployed who has the most control over the AI system and the capacity of a deployed AI. In response this book brings greatly needed clarity to the evolving landscape of AI governance aiding in resolving existing and emerging private law challenges. This book is a timely response to the urgent need to resolve private law liabilities and will appeal to legal professionals policy makers and scholars looking to understand or contribute to the current and future governance of AI within private law. **Corporate Governance in Africa** Victor Ediagbonya, 2024-12-31. This book discusses the issue of limited stakeholder recognition and protection of stakeholder interests within the Anglo Saxon corporate governance model practised in many sub Saharan African countries. The volume argues that the relative success of the Anglo Saxon model in developed economies is attributed to the presence of functional institutions such as effective legal systems active external markets for corporate control and organised civil societies among others. Many African countries such as Nigeria and South Africa have adopted the UK corporate governance framework despite facing challenges occasioned by an inefficient legal system plagued by systemic corruption. Given the challenging institutional contexts in African countries this book proposes an alternative corporate governance framework the functional stakeholder model FSM for the banking industry in countries facing similar institutional challenges. The FSM aims to promote stakeholder recognition and the protection of stakeholders interests. The book draws on stakeholder and institutional theories in designing an alternative corporate governance model the FSM for banks operating in challenging institutional contexts. The book will interest regulators bankers auditors academia policymakers and researchers in comparative corporate governance and financial regulation especially banking regulation and stakeholders in developing and emerging markets. **Proceedings of the Conference on Policy Instruments for Safeguarding Forest Biodiversity--Legal and Economic Viewpoints**, 2004. **Current Publications in Legal and Related Fields**, 2001.
