This Supplemental History Study Booklet has been organized and written by sixteen Society members as a gift to young and older Americans seeking a truthful, realistic and deep understanding of the War Between the States, including the 1850s political sectionalism within the Northern States that gave rise to their Republican Party, the resulting Secession of many Southern States, and the brutal, four-year war campaign by President Lincoln and Republican Governors to conquer Seceded States, force them back under the Federal Government and impose Political Reconstruction on everyone.

Concerning American history, sociology, and political science, prior to completing your education, no knowledge is more important than understanding why America's 1850s political dispute degraded into a war that killed, in round numbers, 400,000 Federal troops and 350,000 Confederate troops, and caused the death of over 200,000 Southern civilians, black and white, while devastating the Southern half of the country. Other books give the history of battles and generals. Here is the rest of the story.

War and Virtual War Jones Irwin, 2004 If the practice of war is as old as human history so too is the need to reflect upon war to understand its meaning and implications The Pre Socratic philosopher Heraclitus asserted in 600BC that War polemos is justice thus inaugurating a long philosophical tradition of consideration of the morality of war In recent times the increased specialisation of academic disciplines has led to a fragmentation of the thematic of war within the academy the topic of war is as likely to be addressed by sociologists cultural theorists psychologists and even computer scientists as it is by historians philosophers or political scientists This diversity of disciplinary approaches to war is undoubtedly fruitful in itself but can lead to an isolation of respective disciplinary analyses of war from each other In July 2002 at Mansfield College Oxford an inter disciplinary conference on war entitled War and Virtual War was held so as to redress some of this disciplinary isolationism and to forge an integrative dialogue on war in all its facets The papers in this volume were nominated by delegates as the most paradigmatic of the ethos of the original project and the most successful in achieving its aims of inter disciplinarity and critical dialogue

*The History of the Confederate War, Its Causes and Its Conduct: A Narrative and Critical History (Complete)* George Cary Eggleston, The war of 1861 65 was in fact a revolution Had the South succeeded in the purposes with which that war was undertaken it would have divided the American Republic into two separate and independent confederations of states the Union and the Southern Confederacy The North having succeeded no such division was accomplished but none the less was a revolution wrought as has been suggested in the introductory chapter of this work Familiarly and by way of convenience we are accustomed to call this The Civil war in contradistinction from those other wars in which the American power has been arrayed against that of foreign nations But the term Civil war as thus applied is neither accurate nor justly descriptive In all that is essential to definition this was a public and not a civil war and it is necessary to a just understanding of the struggle and its outcome to bear this fact in mind Otherwise the entire attitude and conduct of the Federal government toward its antagonist must be inexplicable inconsistent and wanting in dignity The Southern States asserted and undertook to maintain by a resolute appeal to arms their right to an

independent place among the nations of the earth In the end they failed in that endeavor But while the conflict lasted they so far maintained their contention as to win from their adversary a sufficient recognition of their attitude to serve all the purposes of public rather than civil war They instituted and maintained a government with a legislature an executive a judiciary a department of state an army a navy a treasury and all the rest of the things that independent nations set up as the official equipment of their national housekeeping Not only did foreign powers recognize their right to make war not as rebels but as legitimate belligerents entitled to all the consideration that the laws of civilized war guarantee to nations but the United States government itself made similar recognition of the South s status as a power possessed of the right to make war
