SAFETY CHECKLIST

- 1. When checking a motor pump coupling, turn off the power and lock and tag the disconnect before removing the cover to the coupling.
- 2. If you are checking the electrical wires to a pump that has a contactor, shut off the power and remove the cover to the contactor. Do not touch any electrical connections with your hands until you have placed one alligator lead on a ground source such as a conduit. Then touch the other alligator lead to every electrical connection in the contactor box. The reason for this is that some pumps are connected electrically with other disconnects and a circuit from another source may be in the box.
- 3. Ensure that all controls are working properly in a hot water system. Because an overheated boiler has great potential for explosion.
- 4. If an anti-freeze solution is used in a solar domestic hot water system, a double-walled heat exchanger must be used.

33.1 INTRODUCTION TO HYDRONIC HEATING

Hydronic heating systems are systems in which water or steam carries the heat through pipes to the areas to be heated. This text will cover only hot water systems because they are generally used in residential and light commercial installations.

In hydronic systems, water is heated and circulated through pipes to a heat transfer component called a **terminal unit**, such as a radiator or finned-tube baseboard unit. Here heat is given off to the air in the room. The cooler water is then returned to the heat source to be reheated. In most residential installations, there is no forced moving air in these systems, and if properly installed there will be no hot or cold spots in the conditioned space. Hot water stays in the tubing and heating units even when the boiler is not running, so there are no sensations of rapid cooling or heating, which might occur with forced-warm-air systems. Air-conditioning cannot readily be added to a structure that has hydronic heat. Usually, the hydronic system will not accommodate it, and a separate duct system must be added. Then the structure will have two complete systems.
