## Abstract

In order to ensure synchronization, decentralization, and democratization of operations as well as the devolution of power, the collegiate system of administration was implemented in the Kwame Nkrumah University of Science and Technology (KNUST). It is anticipated that it will assist in the decision-making and execution processes to combat the bureaucratic issues related to the faculty system of administration. The study seeks to evaluate the effectiveness of the collegiate system of administration and the challenges associated with it. The study used a mixed method to solicit data. Data was gathered using a structured questionnaire, interviews (Provost, Deans, Heads of Department, Deputy registrars, Accountants, and Librarians) as well as data from secondary sources. Data from each source were analysed descriptively. The study revealed that the collegiate system had cultivated a strong feeling of engagement, and the system has helped towards academic and administrative leadership that deserves a more concentrated focus, and the style of administration has been successful in increasing the scope of operations in the colleges. Appropriate recommendations have been given to reduce the challenges identified.

Hierarchical Decision Modeling Tugrul U. Daim, 2015-07-25 This volume developed in honor of Dr Dundar F Kocaoglu aims to demonstrate the applications of the Hierarchical Decision Model HDM in different sectors and its capacity in decision analysis. It is comprised of essays from noted scholars academics and researchers of engineering and technology management around the world. This book is organized into five parts: Technology Policy Planning, Strategic Technology Planning, Technology Assessment, Application Extensions, and Methodology Extensions. Dr Dundar F Kocaoglu is one of the pioneers of multiple decision models using hierarchies and creator of the HDM in decision analysis. HDM is a mission-oriented method for evaluation and/or selection among alternatives. A wide range of alternatives can be considered, including but not limited to different technologies, projects, markets, jobs, products, cities to live in, houses to buy, apartments to rent, and schools to attend. Dr Kocaoglu's approach has been adopted for decision problems in many industrial sectors, including electronics, research and development, education, government planning, agriculture, energy, technology transfer, semiconductor manufacturing, and has influenced policy locally, nationally, and internationally. Moreover, his students developed advanced tools and software applications to further improve and enhance the robustness of the HDM approach. Dr Kocaoglu has made many contributions to the field of Engineering and Technology Management. During his tenure at Portland State University, he founded the Engineering and Technology Management program where he served as Program Director and later Department Chair. He also started the Portland International Conference on Management of Engineering and Technology (PICMET), which organizes an annual conference in international locations such as Korea, Turkey, South Africa, Thailand, and Japan. His teaching has won awards and resulted in a strong sense of student loyalty among his students, even decades later. Through his academic work and research, Dr Kocaoglu has strongly supported researchers of engineering management and has provided tremendous service to the field. This volume recognizes and celebrates Dr Kocaoglu's profound contributions to the field and will serve as a resource for generations of researchers, practitioners, and students.

This new book presents case studies from the US the UK and Japan Packed full of vignettes from cases studies and subscribing to a socio cultural approach rather than the often tacit assumption that knowledge and technology transfer is a logistical problem this excellent volume illuminates the often misunderstood process of knowledge transfer Arguing that partnership between public and private sector organizations can take many forms some of which are very complicated Brown shows that partnership should not be prescribed as a panacea for the delivery of complex policy in education health and economic regeneration Instead policy makers need to adopt a much more subtle and sophisticated concept of multi agency partnership that acknowledges the time and effort needed to build trust and new shared practices Taking issue with weak theories of change endemic in some policies and emphasizing the process of knowledge creation and the significance of consequent changes in the dynamics of human relations Brown conceptualizes innovation as collaboration between diverse organizations and individuals the result of which is organizational learning This book will be of great
