

A futuristic, high-tech background with a dark blue color scheme. The background is filled with glowing blue lines, circles, and abstract shapes that suggest a complex digital or artificial intelligence environment. The text "AI OVERVIEW" is prominently displayed in the center in a large, white, sans-serif font. The word "AI" is significantly larger than "OVERVIEW".

Sentencing and Artificial Intelligence Jesper Ryberg, Julian V. Roberts, 2022-01-21 This book is the first collective work devoted exclusively to the ethical and penal theoretical considerations of the use of artificial intelligence at sentencing. Jesper Ryberg and Julian V. Roberts bring together leading experts in the field to investigate to what extent and under which conditions justice and the social good may be promoted by allocating parts of the most important task of the criminal court that of determining legal punishment to computerized sentencing algorithms. Intellectual Property Law and Access to Medicines Srividhya Ragavan, Amaka Vanni, 2021-07-28 The history of patent harmonization is a story of dynamic actors whose interactions with established structures shaped the patent regime. From the inception of the trade regime to include intellectual property IP rights to the present, this book documents the role of different sets of actors: states, transnational business corporations or civil society groups and their influence on the structures such as national and international agreements, organizations and private entities that have caused changes to healthcare and access to medication. Presenting the debates over patents, trade and the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) Agreement as it galvanized non-state and non-business actors, the book highlights how an alternative framing and understanding of pharmaceutical patent rights emerged as a public issue instead of a trade or IP issue. The book thus offers an important analysis of the legal and political dynamics through which the contest for access to lifesaving medication has been and will continue to be fought. In addition to academics working in the areas of international law, development and public health, this book will also be of interest to policy makers, state actors and others with relevant concerns working in nongovernmental and international organizations. **Longevity and Geriatrics** Hülya Çakmur, 2025-10-29 The physical aging process, which results in the aging of cells, tissues and organs, varies differently in each individual due to the influence of environmental and life factors. Medical science has long been working to slow down or even stop and reverse the aging process. With the unraveling of the human genetic code, efforts to genetically intervene in the aging process have accelerated, and animal experiments have proven that this is possible. Today, many molecules have been proven to prolong a healthy life span. Despite all these scientific advances, it is a fact of our time that medicine continues to grapple with aging and age-related health issues. Therefore, on the one hand, medicine is advancing rapidly in the field of longevity and anti-aging, and on the other hand, it is advancing in providing optimal care to individuals suffering from age-related health problems. This book provides information on the latest advances in longevity, detailing the health challenges and solutions facing today's geriatric population. *Marketing Strategy* Jenna Tiffany, 2025-10-03 WINNER The BookFest Spring Book Awards 2022 Marketing category first edition WINNER Business Book Awards 2022 Sales Marketing category first edition How can senior marketing leaders develop and implement a proven strategy to deliver measurable results? *Marketing Strategy* offers a clear, authoritative framework designed for senior professionals seeking to lead with confidence in a rapidly evolving marketing
