between the techno pessimism that warns against the harm to children of too much screen time and a techno utopianism that foresees these digital natives leading the way to innovation economic growth increased democratization and national prosperity Nguyen engages cultural histories of childhood youth and creativity through chapters that are each anchored to a particular digital media object or practice Nguyen narrates the developmental arc of a future creative laborer from a young kid playing the island fictions of Minecraft to an older child learning do it yourself skills while reading Make magazine to a teenager posting selfies on Instagram to a young adult creative laborer imagining technological innovations using design fiction Focusing on the constructions and valorizations of creativity entrepreneurship and technological savvy Nguyen argues that contemporary culture operates to assuage profound anxieties about and to defuse valid critiques of both emerging digital technologies and the precarity of employment for creative laborers in twenty first century neoliberal America
