Supported Literacy for Adolescents written by nationally recognized experts introduces an innovative and field tested instructional framework for preparing secondary students to succeed academically in a fast changing and globally networked world Filled with examples from science history literature and special education classrooms the book shows how teachers can enable diverse students including under performers to develop critical thinking and other essential competencies along with the multi literacy tools needed to engage in twenty first century content learning

Educational Computing
Cleborne D. Maddux, Dee LaMont Johnson, Jerry Willis, 2001 This text focuses on general concepts theory and research on teaching learning and technology rather than on hands on assignments at the computer This book is most suitable for courses where students already have basic computing skills and the focus is on issues of integration of technology in the classroom or for courses where computing skills are taught simultaneously with the concepts issues and theories of integration This text is geared toward answering the question What would a teacher do differently if she he used computers in her his classroom The book links actual practice to underlying theories of both teaching and learning It helps students develop their own framework for thinking about educational computing
