Supplement and steroid use among male teenagers Gary Elliott, 2014-06-24 Seminar paper from the year 2010 in the subject Sport Sport Medicine Therapy Nutrition Atlantic International University language English abstract In any paper revolving around teenagers and their use of mass building supplements it is important to note that the use of supplements to build mass and the use of steroids are not mutually exclusive Many authors of works on body image and steroid use believe that they are inextricably linked It is debatable as to whether the use of over the counter supplements are a gateway to the use of more damaging steroids but the overwhelming feeling confirms that the risk is increased when teenagers begin to take

supplements The Centre for Disease Control and Prevention's CDC Youth Risk Behaviour Surveillance United States reports that the percentage of students using steroids increased to 6.1% by 2002. The common belief that supplements are not potentially dangerous has resulted in a limited amount of information about youths of school going age and their supplement use habits. As such, the preliminary information in this paper will focus on the prevalence of steroid use among males. The National Centre for Education Statistics estimated that in 2005 of 16.5 million some 5.4% of the public and private school children between the ages of 14-17 years 660 000 children had used or were using steroids. In Body Dysmorphic Disorder in Men Phillips indicates that between 6 and 7% of high school boys have used these drugs. Phillips 2001 Adolescent anabolic steroid use is a nationwide phenomenon with prevalence rates among high school males ranging from 5.11% with high school athletes continuing to use these agents to improve their athletic performance and appearance despite the associated risks. Proctor 1998 In addition it is reported that school children begin using anabolic steroids before the age of 16 years and up to 86% of these students have no intention to cease their use of these illegal drugs. In light of these statistics in any attempt to reduce the associated health risks of steroid use abuse it is imperative that implementation programmes to that effect are introduced into the school curriculum at the very latest in junior high. Performance enhancing drugs have been around for centuries the ancient Greeks used strychnine and hallucinogenic mushrooms in preparation for the original Olympic Games years later 1886 the first athlete died from using performance enhancing drugs. in Bodybuilding Robin Barratt, 2015-01-26 There are no complicated chemical structures or complex explanations here just some basic facts and figures in layman's terms on what sorts of steroids are used in bodybuilding today and how bodybuilders use them including the most commonly used steroids on the market how they are used and in what quantities as well as Post Steroid Therapy Human Growth Hormone Mechano Growth Factor IGF1 insulin growth hormone releasing peptides and examples of various stacks and cycles Also profiled is Sanabolum the most talked about anabolic steroid on the planet If you are going to use steroids or thinking about it and want some quick easy to read basic information in one place rather than getting lost amongst the thousands of pages and millions of words on the Internet and getting confused with the complex structures and explanations then this is definitely the book for you Steroid-protein Interactions Ulrich Westphal, 1971 This is the story of steroid protein interactions as one investigator sees it Following the general concept of this monograph series it emphasizes the results and interpretations obtained in the author's laboratory and is therefore a subjective account Recognizing how ever that the discussion of the subject would be incomplete if the material were limited to one scientist's work the essential achievements of other investigators have been incorporated An effort has thus been made to give a balanced presentation and to enable the reader to see in perspective the varied facets of the interactions between steroids and proteins Since this is the first comprehensive treatment of the topic it seems appropriate to go to the roots and try to find out how it all started The first chapters therefore take the reader to the laboratories of those who very early conceived the significance of the attachment of dyes drugs and other conspicuous molecules to those colloids called proteins The discovery of the steroid hormones set the stage for meaningful investigation of their interaction with proteins of various origins and functions a process which is continuing today with increasing vigor MEDOC , 1991 Index of U S government literature on health statistics and research information and health care delivery and education material for the lay public
