Canada-U.S. Tax Comparisons John B. Shoven, John Whalley, 2007-12-01 In the increasingly global economy domestic tax policies have taken on a new importance for international economics. This unique volume compares the tax reform experiences of Canada and the United States, two countries with the world's largest bilateral flow of trade and investment. With the signing of the U.S.-Canada Free Trade Agreement and the tax reforms of the 1980s, there has been some harmonization of tax systems. But geographic, cultural, and political characteristics shape distinct national social policies that may impede harmonization. As the U.S. and Canadian economies become even more integrated, differences in tax systems will have important effects in particular on the relative rates of economic growth. In this timely study, scholars from both countries show that while the United States and Canada exhibit similar corporate tax structures and income tax systems, they have very different approaches to sales tax and social security taxes. Despite these differences, the two countries generate roughly the same amounts of revenue, produce similar costs of capital, and produce comparable distributions of income.

The Oxford Handbook of State and Local Government Finance Robert D. Ebel, John E. Petersen, 2012-03-21 State and local government fiscal systems have increasingly become vulnerable to economic changes. Over the past three decades, state and local deficits during economic recession have been larger and deeper each time. The impact of the Great Recession and its aftermath of feeble growth and lingering high unemployment has been dramatic, both in scope and intensity. Before the crisis, long-term structural deficits were persistent for both individual governments and the entire sector as spending plans and patterns outpaced governments' revenue-generating capacity. The revenue systems of these governments eroded while the workloads and scope on the expenditure side of the state and local system budget continued to grow. This handbook evaluates the persistent problems in the fiscal systems of state and local governments and what can be done to solve them. It contains 35 chapters authored by 60 practitioners and academics who are renowned scholars in state and local finance. Each chapter provides a description of the discipline area, examines major developments in policy practices and research, and opines on future prospects. The chapters are divided into four sections. Section I is a systematic discussion of the institutional, economic, and political framework that provides a background for understanding the structure and financial performance of the state and local sector. The chapters in Section II provide an overview of the various components of state and local revenue systems and how they reacted to the Great Recession. They analyze the diverse forms of taxes and charges in detail, prescribe remedies and alternatives, and examine the implications for future revenue performance. Chapters in Section III turn to spending, borrowing, and financial management in the state and local sector. The focus is on the big six service delivery sectors: education, health care, human services, transportation, pensions, and housing. Section IV is a set of chapters that look ahead and speculate about how the state and local government sector's money-raising, spending, and service delivery structures will adjust to the new circumstances.

Control over Administration Patrick O'Brien, 2022-04-27 The US Constitution recognizes the president as the sole legal head of the executive branch. Despite this constitutional authority, the president's actual control over administration varies significantly in practice from one president to the next. Presidential Control over Administration provides a new approach for studying the presidency and policymaking that centers on this critical and often overlooked historical variable. To explain the different configurations of presidential control over administration that recur throughout history, collapse, innovation, stabilization, and constraint, O'Brien develops a new theory that incorporates historical variation in a combination of key restrictions such as time, knowledge, and the structure of government, as well as key incentives such as providing acceptable performance and implementing preferred policies. O'Brien then tests the argument by tracing the policymaking process in the domain of public finance across nearly a century of history, beginning with President Herbert Hoover during the Great Depression and ending with the first two years of the Trump presidency. Although the book focuses on historical variation in presidential control, especially during the New Deal era and the Reagan era, the theory and empirical analysis are highly relevant for recent incumbents. In particular, O'Brien shows that during the Great Recession and beyond, the initial efforts of Presidents Barack Obama and Donald Trump to change the established course during a period of unified party control of the government were largely undercut by each president's limited control over administration. Presidential Control over Administration is a groundbreaking contribution to our understanding of the presidency and policymaking.

The Optimal

Two-bracket Linear Income Tax Joel Slemrod, Shlomo Yitzhaki, Joram Mayshar, 1991 We investigate the optimal rate structure of an income tax system that is constrained to have only two brackets plus a demogrant. We find that in a two-class economy Pareto efficient tax schedules feature at least one marginal tax rate equal to zero and that the marginal tax rate may be increasing or declining. We next use numerical optimization techniques to study the optimal structure of such a tax system in a multi-person model that is a stylized version of an actual economy. We discover that in all cases the tax rate in the second higher bracket is less than the tax rate that applies to the first bracket but that progressivity in the sense of a uniformly rising average tax rate generally obtains. Compared to the optimal one-bracket linear tax system, both the highest and lowest income individuals are better off while a middle range of taxpayers is worse off.
