*Angel Song: Medieval English Music in History* Lisa Colton, 2016-12-08 Although medieval English music has been relatively neglected in comparison with repertoire from France and Italy there are few classical musicians today who have not listened to the thirteenth century song *Sumer is icumen in* or read of the achievements and fame of fifteenth century composer John Dunstaple. Similarly the identification of a distinctively English musical style sometimes understood as the *contenance angloise* has been made on numerous occasions by writers exploring the extent to which English ideas influenced polyphonic composition abroad. *Angel song: Medieval English music in history* examines the ways in which the standard narratives of English musical history have been crafted from the Middle Ages to the present. Colton challenges the way in which the concept of a canon of English music has been built around a handful of pieces, composers and practices each of which offers opportunities for a reappraisal of English musical and devotional cultures between 1250 and 1460. **Mixed**

**Reality and Gamification for Cultural Heritage** Marinos Ioannides, Nadia Magnenat-Thalmann, George Papagiannakis, 2017-04-26 This volume on virtual and augmented reality VR AR and gamification for cultural heritage offers an insightful introduction to the theories, development, recent applications and trends of the enabling technologies for mixed reality and gamified interaction in cultural heritage and creative industries in general. It has two main goals: serving as an introductory textbook to train beginning and experienced researchers in the field of interactive digital cultural heritage and offering a novel platform for researchers in and across the culturally related disciplines. To this end, it is divided into two sections following a pedagogical model developed by the focus group of the first EU Marie S. Curie Fellowship Initial Training Network on Digital Cultural Heritage ITN DCH. Section I describes recent advances in mixed reality enabling technologies while section II presents the latest findings on interaction with 3D tangible and intangible digital cultural heritage. The sections include selected contributions from some of the most respected scholars, researchers and professionals in the fields of VR AR, gamification and digital heritage. This book is intended for all heritage professionals, researchers, lecturers and students who wish to explore the latest mixed reality and gamification technologies in the context of cultural heritage and creative industries. It pursues a pedagogic approach based on trainings, conferences, workshops and summer schools that the ITN DCH fellows have been following in order to learn how to design next generation virtual heritage applications, systems and services.

*The Cinema of Hockey* Iri Cermak, 2017-02-02 Ice hockey has featured in North American films since the early days. Hockey's sizable cinematic repertoire explores different views of the sport, including the role of aggression, the business of sports, race and gender, and the role of women in the game. This critical study focuses on hockey themes in more than 50 films and television movies from the U.S. and Canada, spanning several decades. Depictions of historical games are discussed, including the 1980 *Miracle on Ice* and the 1972 *Summit Series*. National myths that inform ideas of the hockey player are examined. Production techniques that enhance hockey as on-screen spectacle are covered. **Moody's Bank &**
