Analysts today routinely look toward the media and popular culture as a way of understanding global security. Although only a decade ago such a focus would have seemed out of place, the proliferation of digital technologies in the twenty-first century has transformed our knowledge of near and distant events so that it has become impossible to separate the politics of war, suffering, terrorism, and security from the practices and processes of the media. In *Rethinking Global Security*, Andrew Martin and Patrice Petro bring together ten path-breaking essays that explore the ways that our notions of fear, insecurity, and danger are fostered by intermediary sources such as television, radio, film, satellite imaging, and the Internet. The contributors, who represent a wide variety of disciplines including communications, art, history, media studies, women's studies, and literature, show how both fictional and fact-based threats to global security have helped to create and sustain a culture that is deeply distrustful of images, stories, reports, and policy decisions. Topics range from the Patriot Act to the censorship of media personalities such as Howard Stern to the role that *Buffy the Vampire Slayer* and other television programming play as an interpretative frame for current events. Designed to promote strategic thinking about the relationships between media, popular culture, and global security, this book is essential reading for scholars of international relations, technology, and media studies.

**Understanding International Relations in the Indo-Pacific** Aleš Karmazin, Michal Kolmaš, Guangyu Qiao-Franco, 2025-10-30  
Karmazin Kolma and Qiao Franco deconstruct the concept of the Indo-Pacific and offer a timely comparative and multidimensional exploration of the region's international relations. Addressing fundamental academic questions regarding the viability of the Indo-Pacific as a regional conception, this book examines whether the Indo-Pacific is a true regional community or a strategic invention driven by global rivalries and geopolitical interests. Drawing on a rich blend of International Relations, Security Studies, International Political Economy, Human and Political Geography, Cultural Studies, and Area Studies, the book investigates the key thematic areas that define the region's past, present, and future. They include a historical investigation of formation, enculturation, and demarcation of the region; colonization, decolonization, and construction of the modern state; conflicts and wars in trans-regional settings; regional economy and development; institutions and other modes of international or transnational cooperation; and cultures, societies, and identities within and across the Indo-Pacific countries. An essential read for students, scholars, and practitioners of international affairs who seek to make sense of one of the world's most dynamic and contested regions. Chapters 2, 3, and 5 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons

## **Yemen - U.S. Relations: the External and Internal Dynamics: 18th**

**CENTURY - 2012** Dr. Moath A. Alrefaei, 2024-06-22 US Yemeni relations are enveloped in mysteries that have never been fully unraveled Historically these relations have fluctuated dramatically improving momentarily before deteriorating once again The literature on Yemen US relations is riddled with inconsistencies and rarely delves deep into the dynamics at the core of this relationship often overlooking the underlying complexities This book addresses these key issues by exploring the myriad dynamics that drive bilateral relations between the two nations It asserts that Yemen US relations are governed by a complex array of factors broadly categorized as external and internal These dynamics are fluid shifting with the ever changing global environment and circumstances making each stage of the relationship distinct from the next Through a detailed analysis this book offers a new interpretation of the systematic changes in Yemen US relations and their future prospects It highlights the wide range of dynamics characterized by their plurality overlap and dual influence that contribute to the instability and oscillation defining this relationship Externally factors such as regional geo strategic considerations and the legacies of the Cold War alongside the democratization and human rights agenda in the new international order have predominantly shaped the relations Conversely the influence of internal factors was traditionally marginal due to weak mutual interests but this changed dramatically after the September 11 attacks The escalating threats to homeland security posed by terrorist groups in both nations brought a new dimension to the relationship Internal dynamics such as Yemen s conflict with al Qaeda its economic and developmental needs and the country s overall instability were significant in shaping the bilateral relations during the first decade of this century However their influence has since evolved marking a new era in the relationship between Yemen and the US This book stands out from others discussing the general state of Yemeni and American relations in two key ways First it avoids the conventional chronological approach that often becomes tedious opting instead for an analytical methodology that interprets changes in relations based on dominant factors Second it employs established scientific and methodological approaches from political science and international relations to ensure objectivity and enhance its scholarly integrity

Troubled Waters Mehran Kamrava, 2018-05-15 Troubled Waters looks at four dynamics in the Persian Gulf that have contributed to making the region one of the most volatile and tension filled spots in the world Mehran Kamrava identifies the four dynamics as the neglect of human dimensions of security the inherent instability involved in reliance on the United States and the exclusion of Iraq and Iran the international and security policies pursued by inside and outside actors and a suite of overlapping security dilemmas These four factors combine and interact to generate long term volatility and ongoing tensions within the Persian Gulf Through insights from Kamrava s interviews with Gulf elites into policy decisions the consequences of security dilemmas the priorities of local players and the neglect of identity and religion Troubled Waters examines the root causes of conflicts and crises that are currently unfolding in the region As Kamrava demonstrates each state in the region including Saudi Arabia Iran and Qatar has embarked on vigorous

security producing efforts as part of foreign policy flooding the area with more munitions thereby increasing insecurity and causing more mistrust in a part of the world that needs no more tension

### **Global Security Upheaval** Robert Mandel, 2013-04-03

This book calls into question the commonly held contentions that central governments are the most important or even the sole sources of a nation's stability and that subnational and transnational nonstate forces are a major source of global instability By assessing recent real world trends Mandel reveals that areas exist where it makes little sense to rely on state governments for stability and that attempts to bolster such governments to promote stability often prove futile He demonstrates how armed nonstate groups can sometimes provide local stability better than states and how power sharing arrangements between states and armed nonstate groups may sometimes be viable He concludes that these trends in the international setting call for major shifts in our understanding of what constitutes stable governance proposing that we adopt a fluid emergent actor approach And he calls for significant deviation from standard policy responses to the opportunities and dangers posed by nontraditional sources of national authority
