between academic groups and the private sector It is a long and resource intensive endeavor characterized by a high attrition rate Yet new strategies are being explored aiming at accelerating the development of novel treatments from the combination of artificial intelligence with cutting edge experimental approaches and the development of novel types of therapeutic agents to personalized medicine Because drug discovery and development is a vast field with many stakeholders and potential conflicts of interest it is important that the general public gains basic knowledge about the main concepts to be able to make informed healthcare decisions for themselves and family members understand discussions in the news and social networks or proposals from policymakers and politicians Furthermore people are directly affected by the field as patients seeking novel and better treatments as volunteers in clinical trials or as members of patient organizations Building public knowledge and understanding about the field of drug discovery and development will also help to address growing public concerns about how health data should be collected and used
