Handbook on Digital Twin and Artificial Intelligence Techniques

for Rail Applications Maksym Spiriyagin, Stefano Bruni, Colin Cole, 2025-06-17 With contributions from experts from around the world this handbook aims to systemize the existing experience and knowledge that can be used to the development of more efficient and controlled railway systems. As a result this handbook showcases the modern methods, methodologies and frameworks for the development of DT and AI architectures and apparatus in the area of the existing railway systems and transport engineering tasks. The chapters cover such varied and specialized topics as the processes related to the transformation of a physical twin into a digital twin, the application of data driven and physics based simulation approaches in the development of digital twins, asset management application tasks with the implementation of DT and AI and the experimental and field applications of the DT and AI concepts and technologies in railway transport system design and predictive maintenance tasks. Handbook on Digital Twin and Artificial Intelligence Techniques for Rail Applications is essential reading for engineers, practitioners and researchers involved in the development of railway transport and transit systems.

Market-Oriented Disinformation Research Carlos Diaz Ruiz, 2025-03-25

Market Oriented Disinformation Research explores the spread of false or misleading information online through the lens of marketing theory and consumer research. It examines how the business models of digital platforms and advertising technology firms AdTech generate digital markets that incentivize the circulation of harmful content for profit. Rather than viewing disinformation and misinformation as accidental byproducts the book proposes that they thrive in the current markets designed for digital advertising and influencer marketing. Readers will learn how the amplification of disinformation can be linked to social media's business model. Examples include how social media algorithms promote addictive content, how fake news sites use ad fraud to lure in advertising revenue and how some content creators rely on clickbait, ragebait, bots and conspiracy theories to boost their engagement metrics. The book is a must read for scholars in journalism, media studies and political communication as well as policymakers interested in the democratic governance of social media platforms. In addition it calls for digital marketing, advertising and brand management professionals to take responsibility for their ad spending by advocating for greater oversight over AdTech intermediaries to prevent unethical actors from monetizing the harmful content that polarizes society.

Radiopharmaceutical Extravasations: Impact on Patients, Providers, Payers, Radiation Safety, Research, and Regulations Medhat M. Osman, David Townsend,Ronald Keith Lattanze,2025-12-19 Radiopharmaceutical extravasations have been present since the beginning of nuclear medicine While there has been a significant increase in interest over the past five years regarding these extravasations there is minimal understanding of the issue Furthermore there is little published information on radiopharmaceutical extravasations compared to chemotherapy contrast CT and other pharmaceutical extravasations As the energy emissions of routinely administered diagnostic radiopharmaceuticals have and continue to evolve in nuclear medicine over the past five decades and as more and more radiotherapeutics enter the market there is a need educate all stakeholders on this important topic Most nuclear medicine facilities do not proactively monitor the quality of their radiopharmaceutical administrations Because radiopharmaceutical administrations usually involve small volumes and do not cause a burning sensation and because injections sites are not routinely included in the imaging field of view many extravasations can go unnoticed Since large diagnostic radiopharmaceutical extravasations and most radiotherapeutic extravasations can result in high absorbed doses to healthy tissue and can compromise the intended nuclear medicine procedure our goal is to increase awareness of this topic As nuclear medicine facilities increase their understanding of this pernicious administration error and take appropriate steps to prevent extravasations patient care will improve
