Constructing Professional Discourse Concepción Orna-Montesinos,2012-01-17 This book explores the fascinating role that language plays in the construction of non verbal objects by mapping out the ontological meaning of the specialised concepts and the domain specific knowledge embedded in them In doing so it provides a comprehensive linguistic insight into the discourse of professional domain specific communities and hence into the communication practices and procedures of those communities In this respect the book offers a response to the claims made by many of the most influential applied linguists today such as Vijay Bhatia 1993 2004 John Swales 1990 2004 or Ken Hyland 2002 among others who have consistently defended the need for applied linguistic research into the textual generic and social perspectives on the under researched interrelatedness of the discoursal and professional practices of a discipline Specifically this book provides readers with an integrative multi perspective approach to the study of professional domain specific discourses While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the theoretical and empirical foundations of applied linguistics cognitive linguistics corpus linguistics and ontological engineering The book starts from the analysis of domain specific texts as final written products with specific lexico grammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to the social context of production and interpretation of the text This integrative approach provides

fresh new insights into the way the processes of writing are affected by the community specific institutional and socio historical circumstances in which domain specific texts are produced Developing Property Sustainably Sara J. Copy Protection No Pages 548 File Size 2 9 MB Edition 1st edition Language English Author Mark Bernerberg Targetgroups All professionals decision makers managers directors employees investors and founders in the real estate construction and finance sectors and also the members of university landscape policy makers However who has interest to understand digital and sustainable transformations in the real estate sectors Description In an era marked by accelerating urbanization climate imperatives and evolving regulatory landscapes the built environment has emerged as both a challenge and a cornerstone for sustainable development Sustainable Real Estate A Comprehensive Guide to Investment Management Assessment Scoring and Reporting authored by Mark Bernerberg provides an indispensable academic and professional resource for real estate

stakeholders navigating the complexities of Environmental Social and Governance ESG compliance and sustainable value creation. This first edition published in 2024 as part of the Sustainability Research Editions series offers a systematic and interdisciplinary examination of sustainability integration in real estate. Drawing from Bernerberg's extensive expertise in finance, legal frameworks, and real estate valuation, the book presents a rigorous, empirically grounded framework for sustainable real estate management tailored to meet the demands of the European Union's CSRD, CSDDD, and Taxonomy regulations. The work distinguishes itself through its breadth and analytical depth, spanning 33 comprehensive chapters. It covers key areas such as investment and fund management, sustainability benchmarking, portfolio strategy, life cycle cost analysis, digital transformation, and ESG reporting. Each chapter not only explores conceptual underpinnings but also provides practical methodologies, case studies, and real world application tools designed to guide professionals in implementing best practices across the property lifecycle. Bernerberg introduces advanced evaluation models such as sustainability scoring systems and automated valuation techniques alongside detailed discussions on data analytics, IoT, BIM, and AI as enablers of smart, transparent, and efficient real estate management platforms. These technological integrations are presented not as ancillary tools but as central to achieving sustainability targets at the asset portfolio and institutional levels. Importantly, the book situates sustainable real estate within a broader socio-economic and ecological context, emphasizing its role in fostering resilient, inclusive urban communities and contributing to global climate objectives. In doing so, it addresses not only the financial imperatives of sustainability but also its social and ethical dimensions, offering a triple bottom line approach that resonates with both corporate strategists and public policy advocates. Designed for a multidisciplinary audience including investors, asset managers, sustainability officers, property developers, and policymakers, *Sustainable Real Estate* stands as a landmark publication. It bridges the gap between regulatory obligations and strategic opportunity, equipping readers with the tools to operationalize sustainability in real estate while aligning with long term value creation. In summary, Bernerberg's contribution is more than a textbook; it is a roadmap for the real estate industry's transition toward a decarbonized, data-driven, and ethically grounded future. It is an essential reference for anyone seeking to understand or influence the future of sustainable property investment and governance.

Policy Framework for Sustainable Real Estate Markets United Nations Publications, 2019-11-25 The UNECE Real Estate Market Advisory Group REM is a group of real estate experts who advise the Committee on Urban Development, Housing and Land Management on sustainable real estate markets, working to identify specific measures to strengthen a country's real estate market in a manner that would contribute to economic growth and sustainable development. In 2010, the REM Advisory Group published the Policy Framework for Sustainable Real Estate Markets, a tool that would help guide the member States to create sustainable real estate markets. However, the emergence of key international agreements such as the 2030 Agenda for Sustainable Development, the Geneva UN Charter on Sustainable Housing, the New Urban Agenda, the Paris Agreement, and the Basel III Agreement have led to the

establishment of new global and regional policy frameworks for future activities on sustainable urban development at all levels In response to the request of the Committee to update the Policy Framework to reflect the emergence of such key agreements the REM Advisory Group produced the current publication which now also includes updates on the issues such as urbanization migration and mobility flows technology and innovation the growth of emerging markets and asset competition the change in housing demand oriented towards green buildings and new designs energy consumption and climate change and other relevant phenomena Moreover this version of the Policy Framework for Sustainable Real Estate Markets maintains that contrary to the widespread belief that finance and real estate sectors have negative impact on sustainability they can actually contribute to the achievement of Sustainable Development Goals with the implementation of effective and compatible principles In particular this publication shows that these principles can be incorporated by national local and municipal governments and applied to various forms of real estate **Environmental Law** ,1991 *Sustainable Landscape Construction* J.
