## **Wealth And Power Chinas Long March To The Twenty First Century:**

**Wealth and Power** Orville Schell, John Delury, 2013-07-16 By now everyone knows the basic facts of China's rise to pre-eminence over the past three decades. But how did this erstwhile sleeping giant finally manage to arrive at its current phase of dynamic growth? How did a century long succession of failures to change somehow culminate in the extraordinary dynamism of China today? By examining the lives of eleven influential officials, writers, activists and leaders whose contributions helped create modern China, *Wealth and Power* addresses these questions. This fascinating survey moves from the lead up to the first Opium War through to contemporary opposition to single party rule. Along the way we meet titans of Chinese history, intellectuals and political figures. By unwrapping the intellectual antecedents of today's resurgent China, Orville Schell and John Delury supply much needed insight into the country's tortured progression from nineteenth century decline to twenty first century boom. By looking backward into the past to understand forces at work for hundreds of years, they help us understand China today and the future that this singular country is helping shape for all of us.

**Becoming China** Jeanne-Marie Gescher, 2017-11-09 An account of China's past and present, how a small group of people at the edges of the Yellow River evolved to become the state of China today. Despite decades of a relatively open door relationship with the rest of the world, China is still a mystery to many outside it. How does China work? What does it want? Why does it want it? And what does its rise to global power mean for the rest of the world? As the twenty first century looks set to be the stage for a battle about competing geopolitical ideals, these are urgent questions for everyone with an interest in what the future might bring. A world of its own, China is both a microcosm and an amplification of questions and events in the wider world. China's story offers us an opportunity to hold a mirror to ourselves, to our own assumptions, to our values and to our ideas about the most important question of all: what it means to be human in the world of the state. Epic in scope, this is the story of how China became the state it is today and how its worldview is based on what has gone before. Weaving together inspirations, ideas, wars and dreams, Jeanne Marie Gescher reveals the heart of what it means to be Chinese and how the past impacts the present.

**The Chinese Idea of a University** Rui Yang, 2022-09-02 In The Chinese Idea of a University Phoenix Reborn Rui Yang conceptualizes the cultural foundations of modern university development in Chinese societies Instead of focusing on the uniqueness of the societies this book aims to prove that one educational purpose could be fulfilled via many paths and that most of the characteristics the university could be found in other institutions of higher learning Citing the practices of four selected Chinese societies Yang opposes the existence of an impassable chasm between Chinese and Western ideas of a university and argues that it is possible to combine Chinese and Western ideas of a university Also this book is one of the first in English to theorize the Chinese idea of a university It links the historical events to the present in a context of an enormous impact of Western academic models and institutions from the beginning of modern universities in Chinese societies to the contemporary period The scholarship is of high quality based on a thorough critical reading of relevant literature in both English and Chinese as well as detailed empirical research carried out on the campuses of eight leading universities in the four Chinese societies under consideration Ruth Hayhoe professor University of Toronto Yang Rui has produced an academic masterwork China has arrived as a global power and the East Asian university has achieved or largely achieved the long project of catch up to the West The future begins now and question of the Chinese idea of a university should trigger much discussion Professor Yang favors the development of hybrid East West higher education in the Chinese civilizational zone noting that to an extent existing universities have taken this path already He develops these challenging issues with a depth of scholarship far exceeding the current journal papers in the topic area and a style of exposition that reads really well A book of lasting importance Highly recommended Simon Marginson professor University of Oxford joint editor in chief Higher Education
