Constitutive Modeling of Geomaterials Qiang Yang, Jian-Min Zhang, Hong Zheng, Yangping Yao, 2012-08-22 The Second International Symposium on Constitutive Modeling of Geomaterials Advances and New Applications IS Model 2012 is to be held in Beijing China during October 15 16 2012 The symposium is organized by Tsinghua University the International Association for Computer Methods and Advances in Geomechanics IACMAG the Committee of Numerical and Physical Modeling of Rock Mass Chinese Society for Rock Mechanics and Engineering and the Committee of Constitutive Relations and Strength Theory China Institution of Soil Mechanics and Geotechnical Engineering China Civil Engineering Society This Symposium follows the first successful International Workshop on Constitutive Modeling held in Hong Kong which was organized by Prof JH Yin in 2007 Constitutive modeling of geomaterials has been an active research area for a long period of time Different approaches have been used in the development of various constitutive models A number of models have been implemented in the numerical analyses of geotechnical structures The objective of the symposium is to provide a forum for researchers and engineers working or interested in the area of constitutive modeling to meet together and share new ideas achievements and experiences through presentations and discussions Emphasis is placed on recent advances of constitutive modeling and its applications in both

theoretic and experimental aspects Six famous scholars have been invited for the plenary speeches of the symposiums Some prominent scholars have been invited to organize four specialized workshops on hot topics including Time dependent stress strain behavior of geomaterials Constitutive modeling within critical state soil mechanics Multiscale and multiphysics in geomaterials and Damage to failure in rock structures A total of 49 papers are included in the above topics In addition 51 papers are grouped under three topics covering Behaviour of geomaterials Constitutive model and Applications The editors expect that the book can be helpful as a reference to all those in the field of constitutive modeling of geomaterials

Analytical Methods in Petroleum Upstream Applications

Cesar Ovalles,Carl E. Rechsteiner Jr.,2015-04-02 Effective measurement of the composition and properties of petroleum is essential for its exploration production and refining however new technologies and methodologies are not adequately documented in much of the current literature Analytical Methods in Petroleum Upstream Applications explores advances in the analytical methods and instrumentation that allow more accurate determination of the components classes of compounds properties and features of petroleum and its fractions Recognized experts explore a host of topics including A petroleum molecular composition continuity model as a context for other analytical measurements A modern modular sampling system for use in the lab or the process area to collect and control samples for subsequent analysis The importance of oil in water measurements and monitoring The chemical and physical properties of heavy oils their fractions and products from their upgrading Analytical measurements using gas chromatography and nuclear magnetic resonance NMR applications Asphaltene and heavy ends analysis Chemometrics and modeling approaches for understanding petroleum composition and properties to improve upstream midstream and downstream operations Due to the renaissance of gas and oil production in North America interest has grown in analytical methods for a wide range of applications The understanding provided in this text is designed to help chemists geologists and chemical and petroleum engineers make more accurate estimates of the crude value to specific refinery configurations providing insight into optimum development and extraction schemes
