Artificial Intelligence in Education. Posters and Late Breaking Results, Workshops and Tutorials, Industry and Innovation Tracks, Practitioners' and Doctoral Consortium Maria Mercedes Rodrigo, Noburu Matsuda, Alexandra I. Cristea, Vania Dimitrova, 2022-07-25 This two volume set LNAI 13355 and 13356 constitutes the refereed proceedings of the 23rd International Conference on Artificial Intelligence in Education AIED 2022 held in Durham UK in July 2022. The 40 full papers and 40 short papers presented together with 2 keynotes 6 industry papers 12 DC papers 6 Workshop papers 10 Practitioner papers 97 Posters and Late Breaking Results were carefully reviewed and selected from 243 submissions. The conference presents topics such as intelligent systems and the cognitive sciences for the improvement and advancement of education the science and engineering of intelligent interactive learning systems. The theme for the AIED 2022 conference was AI in Education Bridging the gap between academia business and non profit in preparing future proof generations towards ubiquitous AI

An Overview of Artificial Intelligence and Robotics. Volume 1: Artificial Intelligence. Part C: Basic AI Topics United States. National Aeronautics and Space Administration, William B. Gevarter, 1983 **How To**

Get Into AI Viriversity Online Courses, 2025-02-20 Embark on an exciting journey into the world of Artificial Intelligence with our comprehensive online course. Designed for beginners this course will equip you with the foundational knowledge needed to understand and engage with AI technologies opening doors to numerous career opportunities. Master the Fundamentals of Artificial Intelligence Gain a solid understanding of AI concepts and terminologies. Learn about the historical background and evolution of Artificial Intelligence Discover the practical applications and potential of AI in various industries. Acquire skills to identify and analyze AI trends and developments. Introduction to AI Understanding the Basics of Artificial Intelligence Artificial Intelligence is transforming industries and shaping the future of technology. This course begins with an introduction to the core concepts and definitions that form the basis of AI. You will explore the historical milestones that have led to the current advancements in AI gaining an appreciation for its rapid evolution. Through engaging lectures and practical examples you will learn about the diverse applications of AI from robotics and natural language processing to image recognition and beyond. This course will also provide insights into how AI is being implemented across different sectors including healthcare finance and automotive industries. By the end of this course you will have developed the ability to critically assess AI trends and contribute to discussions about its future impact. You will be equipped with a foundational understanding that prepares you for more advanced AI studies or to enter AI related fields. Upon completing this course you will emerge with a newfound confidence in your ability to engage with AI technologies and a clearer vision of how AI can be leveraged to enhance personal and professional growth

Artificial Intelligence in Education. Posters and Late Breaking Results, Workshops and Tutorials, Industry and Innovation Tracks, Practitioners, Doctoral Consortium and Blue Sky Andrew M. Olney, Irene-Angelica Chounta, Zitao Liu, Olga C. Santos, Ig Ibért Bittencourt, 2024-07-01 This volume constitutes poster papers

and late breaking results presented during the 25th International Conference on Artificial Intelligence in Education AIED 2024 which took place in Recife Brazil during July 8-12 2024. The 18 full papers and 92 short papers were carefully reviewed and selected from 200 submissions. They are organized in topical sections as follows: Part One: Blue Sky Industry Innovation and Practitioner WideAIED and Late Breaking Results; Part Two: Late Breaking Results, Doctoral Consortium Workshops and Tutorials. Artificial Intelligence in Education, Posters and Late Breaking Results, Workshops and Tutorials, Industry and Innovation Tracks, Practitioners, Doctoral Consortium and Blue Sky Ning Wang, Genaro Rebolledo-Mendez, Vania Dimitrova, Noboru Matsuda, Olga C. Santos, 2023-06-29. This volume constitutes poster papers and late breaking results presented during the 24th International Conference on Artificial Intelligence in Education AIED 2023 Tokyo Japan July 3-7 2023. The 65 poster papers presented were carefully reviewed and selected from 311 submissions. This set of posters was complemented with the other poster contributions submitted for the Poster and Late Breaking results track of the AIED 2023 conference.

Innovations in Teaching and Learning for Health Professions Educators Roger Edwards, Bobbie Ann Adair White, Ardi Findyartini, 2025-06-02. The health professions continue to evolve and change rapidly as more opportunities and challenges emerge. Hence health professions educators are required to be adaptive and nimble in their creation and adoption of teaching and learning innovations. These innovations have included teaching with technologies like virtual reality, gamification, online applications, and artificial intelligence. Innovations also include know-how such as emotional intelligence and ways of approaching the learning process through student-centered learning experiences grounded in the cognitive science of learning. Scholarship related to identification of the best uses of different innovations is difficult. The same innovations have proven to be engaging in some contexts and burdensome in others. Additionally, simulation-based education continues to incorporate innovations in how health professions educators are taught, with more focus on effectiveness of the simulation educator, including applications with distance simulation. Training and development for health professions and simulation educators is becoming more formalized, yet gaps on effectiveness of training and development efforts persist. Faculty effectiveness, especially as it relates to educational innovation adoption, is difficult to measure and demonstration of related competencies is in its infancy. The goal of this Research Topic is to bring together state-of-the-art examples of scholarship in health professions education related to the awareness and appropriate adoption of innovation, which is broadly defined as an idea, practice, technology, and know-how. Evidence about the current state of emerging innovations, effectiveness of innovations, and evidence about the competencies needed for teaching in our evolving environments are all areas of interest for this collection. All types of scholarship can support this focus, including analyses based on primary quantitative and qualitative data collection, secondary data analyses, literature reviews, and methodological infrastructure tool development. Additionally, scholarship investigating how these innovations have influenced health professions educators, including their training and development, is part of the goal of the collection. The scope of this collection covers any

innovations that are applicable to professional development and implementation for health professions educators More specifically we invite scholarship related to how educators prepare themselves for meeting the needs of their students given the changing roles and innovations available to both faculty and students across learning environments worldwide Examples of topics of interest include Analyses of innovation related to the evolving roles of health professions educators Reviews of educational innovation adoption by health professions education faculty especially related to artificial intelligence linked applications Exploring factors associated with professional development training and effective educational innovation adoption by faculty Simulation based educational innovation applications for faculty development Faculty innovation in resource constrained environments in low and middle income countries Methodological challenges associated with studying educational innovations by faculty in health professions education and critical research needs associated with generating and evaluating educational innovations Methodological considerations associated with health professions education faculty competencies Theoretically focused analyses are welcome as long as they are linked to applications An Overview of Artificial Intelligence and Robotics: Artificial intelligence. pt. A. The core ingredients. pt. B. Fundamental application areas. pt. C. Basic AI topics William B. Gevarter,1983 **An Overview of Artificial Intelligence and Robotics** William B.
