## **iCloud Review Returns:**

**My Pages, Numbers, and Keynote (for Mac and iOS)** Brad Miser, 2015-03-31 Be More Productive with Pages Numbers and Keynote Pages Numbers and Keynote are Apple's office business productivity software applications. Originally a suite of software called iWork, these apps are roughly the equivalent of Microsoft Office's Word, Excel, and PowerPoint but implemented quite differently with Apple's approach to design and functionality. Written by Apple hardware and software expert Brad Miser, My Pages, Numbers, and Keynote includes full-color step-by-step tasks to walk you through these key applications so you can quickly accomplish exactly what you want through word processing, spreadsheets, and presentations. The tasks include how to store your documents on the cloud so you can work with them on any device including Mac and Windows computers, iPads, and iPhones. Use templates so that creating amazing-looking documents is fast and easy. Add text to your documents by typing or dictation and then use powerful tools to format that text easily and quickly. Enhance your Pages documents by including tables, charts, photos, tables of content, headers, footers, and more. Use Numbers spreadsheets to organize, format, calculate using built-in or custom formulas, report, and present information in tables and charts. Use Keynote to build amazing presentations including text, images, charts, animation, and more. Share your documents by creating PDFs or printing them, provide digital versions of your documents to others using email, AirDrop, or messages. Collaborate with others on your documents through comments, track changes, and in real time with iCloud. **Learning iPad Programming** Kirby Turner, Tom Harrington, 2013-05-13 Not many books have a single project that lives and evolves through the entire narrative. The reason not many books do this is because it is difficult to do well. Important toolkit features get shoehorned in weird places because the author didn't do enough up-front design time. This book though takes you from design to a prototype to the Real Deal. And then it goes further. Mark Dalrymple, cofounder of CocoaHeads, the international Mac and iPhone programmer community, author of *Advanced Mac OS X Programming: The Big Nerd Ranch Guide*, *Learning iPad Programming*, Second Edition will help you master all facets of iPad programming with Apple's newest tools. Its in-depth hands-on coverage fully addresses the entire development process from installing the iOS SDK through coding, debugging, submitting apps for Apple's review, and deployment. Extensively updated for Apple's newest iOS features and Xcode 4.x, updates this book teaches iPad programming through a series of exercises centered on building PhotoWheel, a powerful personal photo library app. As you build PhotoWheel, you'll gain experience and real-world insights that will help you succeed with any iPad development project. **Leading iOS developers** Kirby Turner and Tom Harrington introduce the essentials of iOS development focusing on features that are specific to iPad. You'll find expert coverage of key topics many iOS development books ignore, from app design to Core Data. You'll also learn to make the most of crucial iOS and Xcode features such as Storyboarding and Automatic Reference Counting (ARC) and extend your app with web services and the latest iCloud syncing.

techniques Learn how to Build a fully functional app that uses Core Data and iCloud syncing Use Storyboarding to quickly prototype a functional UI and then extend it with code Create powerful visual effects with Core Animation and Core Image Support AirPrint printing and AirPlay slideshows Build collection views and custom views and use custom segues to perform custom view transitions Download the free version of PhotoWheel from the App Store today Import manage and share your photos as you learn how to build this powerful app
