 with phosphorus are included e g phosphates hypophosphates or phosphinates Similar compounds of the other ele ments like  
 silicates arsenates etc were already treated in Thorium Suppl Vol C 2 1976 Most of the compounds in the different systems  
 treated in this volume are of scientific interest because of their special physical and chemical properties On the other hand  
 there are also many compounds wh ich are of specific technological interest mainly in the nuclear field Refractory  
 compounds like ThSi or ThP have potential interest as nuclear fuel for special reactors due to their physical properties like  
 good heat conductivity and their chemical stability e g against the corrosion of cladding alloys for nuclear fuel elements Due  
 to the present situation in the further development of the thorium nuclear fuel cycle their large potential has not yet been  
 fully investigated For most of the binary and ternary phases in these systems we presently have good knowledge about the  
 preparation of the compounds and their physical and chemical properties But nevertheless there are still a lot of open  
 questions concerning phase equilibria solid solutions and homogeneity of some of the phases described in this volume
