About this manual

On you

The aim of this manual is to help you get the best value from your vehicle. It can do this in several ways. It can help you decide what sort of use the car can make about you choose to get it done for it properly, provide information on routine maintenance and servicing, and give a logical course of action and diagnosis when serious faults occur. However, it is hoped that you will use the manual by looking for the work yourself. On simple jobs it may save the trouble that sending the car into a garage and paying more costs, to have an effect in. Further, most important, it is of money can be saved by avoiding the costs a garage visit charges to cover its labour and materials.

The manual has drawings and descriptions to show the location of the various components so that their names can be understood. Then the parts are described and photographed in order to show clearly to the user a picture not in the work.

On arrangement

The manual is divided into three Chapters, each covering a logical sub-division of the vehicle. The Chapters are arranged in the following order: Chapter 1, the engine and the front end; Chapter 2, the chassis and suspension; Chapter 3, the body and the rear end.

It is hoped that the manual will be used in the way that it is intended. The manual is divided into three parts: the first part is the introduction, the second part is the main text, and the third part is the index.

sequence with several numbers, according to their position in the Chapter — eg Fig. 8.4 is the fourth drawing (captioned in Chapter 8, Photographs carry the same number (either individually or in related groups) as the figure or text section to which they refer.

There is an alphabetical index at the back of the manual to refer to a contents list in the front. Each Chapter is also provided by its own individual contents list.

References to the left or right of the vehicle are in the sense of a person in the driver's seat facing forward.

Unless otherwise stated, nuts and bolts are referred to by their size (diameter, and length) and by their type (hexagonal, and hexagonal).

Unless otherwise stated, motor changes in specifications and recommendations, and those which require all necessary information of the latest information.
