

tailgate.

Press the large remote control button.

The remote control emits a short beep and the turn signal lamps produce a long acknowledgement signal.

The car is now locked and the alarm activated. The visual acknowledgement signal from the turn signal lamps confirms that the system has received the remote control signal.

Alarm activated, indication

When the alarm is activated the indicator LED flashes briefly.

If a door, the hood, sun roof, trunk lid or tailgate is open the indicator LED lights for 5 seconds and then starts flashing.

Note! The alarm cannot be activated with the ignition on.

Deadlocking is automatically activated when the alarm is activated in 850 models with this function. In these cars, an extra acknowledgement flash is given if function is normal.

Auto activation

(Only applies to version 6, see "Programming Guard Alarm II functions").

The alarm can be activated without locking the doors:

- Switch off the ignition.
- Open and close one of the doors.

30 seconds after the last door is closed the alarm will be activated without the doors being locked.

Deactivating the alarm

The alarm can be deactivated by pressing the large remote control button. The indicator LED goes out immediately.

When the alarm is deactivated the turn signal lamps give an acknowledgement signal of two flashes. The interior lighting lights, the doors, the hood, sun roof, trunk lid or tailgate are unlocked.

Note! If the doors, the hood, sun roof, trunk lid or tailgate are not opened within 2 minutes following deactivation, the alarm is reactivated, locking the doors, the hood, sun roof, trunk lid or tailgate.

When the alarm is triggered

Note! The alarm cannot be triggered until 10 seconds after activation.
