Tok Trending Anxiety Relief Review:

Substance Abuse - New Compounds and New Problems Javier Navarro-Zaragoza,2025-10-29 The Edited Volume

Substance Abuse New Compounds and New Problems is a compilation of peer reviewed and relevant research chapters that provide a comprehensive overview of the latest advances in the field of substance abuse. The book comprises individual chapters written by various researchers and edited by an expert in the field. All chapters are independent but are linked by a common research theme. This publication aims to provide a comprehensive overview of the latest research efforts by international authors in neuroscience and to open up new avenues of research for future novel advances.

Cognitive and Affective Factors in Relation to Learning Mikaela Nyroos,Johan Korhonen,Riikka Mononen,2022-11-10 Both domain general e g working memory executive functions and domain specific e g number processing phonological processing cognitive factors have been found to predict learning in different age groups. Likewise research has shown that various affective factors such as different emotions e g anxiety self concept and interest need to be considered when investigating individual differences in learning. However few studies have investigated both cognitive and affective factors simultaneously in relation to learning. In particular there is a lack of studies investigating the interplay i e moderation and mediation between cognitive and affective factors on learning. The goal of this Research Topic is to deepen our knowledge on the relations between learning and both cognitive and affective factors in different age groups. We aim to provide a broad scope of emerging areas in research on cognitive and affective factors especially related to academic learning e g mathematics reading and other school subjects. Studies focusing simultaneously looking at the interplay of these constructs as well as longitudinally are of great interest. Further we are interested in innovative study designs and recent advances in methodology in this field. To promote quality education for all and equity in education cognitive and affective factors related to aspects of learning ranging from pre school to tertiary provision and inclusion of individuals with special educational needs are of interest.

You're Not Done Yet Dr. B. Janet Hibbs,Dr. Anthony Rostain,2024-03-26 A clear eyed optimistic guide for parents with adult children who need help navigating the challenges to launching an independent life. Times were already tough for young adults looking for ways to start living independent lives after high school and college rents were up wages were down student loan debt was burdensome then the Covid 19 pandemic hit. A generation of young people were forced out of their classrooms jobs and social lives returning home to live with their parents. Now many of these young adults carry the scars of the internal pandemic with increased anxiety and depression poor coping and the uncertainty of how to restart their lives. Parents want to help but the old rules of advice giving can clash with the need to respect their child's autonomy. In You're Not Done Yet two leading adolescent and young adult mental health experts provide a practical and compassionate path to parents combatting the worry and frustrating isolation many feel when supporting their twentysomethings. Hibbs and Rostain explain when and how developmental markers changed and invite parents and young adults to learn new more effective ways of communicating.

with each other Part I of the book covers the new normal of young adulthood with its educational and career changes The new normal of parent child relationship asks us to rethink our shoulds and in the process develop a closer relationship based on talking and listening to understand each other rather than being right Part II addresses the common and challenging problems that arise when mental illness creates a drag on a young adult s progress and shows how parents may be engaged in their child s treatment Packed with helpful information and step by step guides to specific problems this book will be an invaluable resource for parents and their twentysomething children

Mental Health, Social Media, and the Meta Dov Greenbaum, Nazanin Alavi, 2024-11-11 One of the most damaging externalities from the recent pandemic has been the rise in mental health issues Many psychiatric disorders have strong genetic

components and although the extent of the genetic influence for many conditions has been extensively tested by genome wide association studies GWAS there remains much to be understood regarding the genetics of these health issues Twin studies for example have found a relatively high rate of inheritance for depression and anxiety disorders To better appreciate the role that genetics plays in these disorders it is useful to understand the extent to which other factors also contribute to the condition Other major contributing factors to mental disorders are the environment and psychological factors These environmental and psychological concerns have been further exacerbated by the growth of social media and the requirement especially for young adults and teenagers to always be on It is likely that the metaverse in whatever form it ultimately takes will further exacerbate these conditions On the other hand social media and the metaverse can be tools to help those suffering from mental health conditions Online therapists and bots can provide frontline care to those who can t or won t go to an in person therapy session AI can be employed to provide some forms of therapy in light of the growing demand for licensed therapists and the limited supply **The Hindu Weekly Review** ,1967 **Index to Scientific Reviews** ,1987
