Reshaping STEM Education: Strategies for Curriculum Decolonization and Institutional Transformation Zahid Pranjol, Alia Amir, 2025-11-13 The field of STEM higher education is currently grappling with the imperative need for transformative discourse to address its historical epistemological and colonial underpinnings. Despite significant advancements in STEM disciplines, there remains a critical gap in inclusivity and equity within higher educational institutes. Recent studies have highlighted the persistent colonial structures that shape STEM education, often marginalizing diverse voices and perspectives. Efforts to decolonize STEM education are gaining momentum, yet there is a pressing need for comprehensive research and reflective insights to uproot these entrenched structures. This research topic aims to address these gaps by fostering a robust dialogue that transcends traditional boundaries, promoting a deeper understanding of the challenges and opportunities in reshaping STEM education through decolonial lenses. This research topic aims to provide a scholarly platform for researchers, educators, and practitioners to contribute groundbreaking research and reflective insights on decolonizing STEM higher education. The primary goal is to facilitate a robust dialogue that transcends traditional boundaries, fostering a deeper understanding of the challenges and opportunities in reshaping STEM education through decolonial lenses.

Introductory Algebra Julie Miller, 2014-01-24 Get Better Results with high quality content, exercise sets, and step-by-step pedagogy. The Miller O'Neill Hyde author team continues to offer an enlightened approach grounded in the fundamentals of classroom experience in *Introductory Algebra*. The text reflects the compassion and insight of its experienced author team, with features developed to address the specific needs of developmental level students. Throughout the text, the authors communicate to students the very points their instructors are likely to make during lecture, and this helps to reinforce the concepts and provide instruction that leads students to mastery and success. Also included are Problem Recognition Exercises designed to help students recognize which solution strategies are most appropriate for a given exercise. These types of exercises, along with the number of practice problems and group activities available, permit instructors to choose from a wealth of problems, allowing ample opportunity for students to practice what they learn in lecture, to hone their skills. In this way, the book perfectly complements any learning platform, whether traditional lecture or distance learning; its instruction is so reflective of what comes from lecture that students will feel as comfortable outside of class as they do inside class with their instructor.

Resources in Education, 1985-10 EdPsych Modules Cheryl Cisero Durwin, Marla Reese-Weber, 2019-12-04 *EdPsych Modules* uses an innovative modular approach and case studies based on real-life classroom situations to address the challenge of effectively connecting theory and research to practice. Succinct stand-alone modules are organized into themed units and offer instructors the flexibility to tailor the book's contents to the needs of their course. The units begin with a set of case studies written for early childhood, elementary, middle, and secondary classrooms, providing students with direct insight into the dynamics influencing the future students they plan to teach. All 25

modules highlight diversity emphasizing how psychological factors adapt and change based on external influences such as sex gender race language disability status and socioeconomic background The Fourth Edition includes over three hundred new references across all 25 modules and expanded coverage of diversity in new diversity related research This title is accompanied by a complete teaching and learning package *Overcoming Math Anxiety* Randy Davidson,2000
