## Introduction

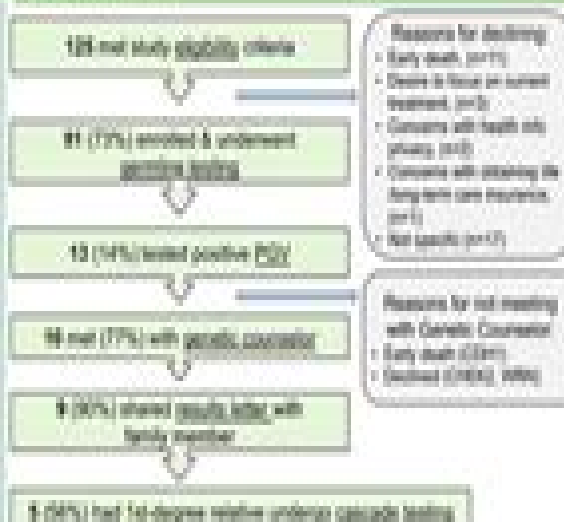

- Identification of pathogenic germline variants (PGVs) is important for patients with advanced cancer: guiding treatment decisions, cancer screening, and testing of family members.
- Despite this, barriers to testing still exist.
- Streamlined processes for genetic testing are needed.
- We assessed the feasibility of a novel genetic counseling/testing approach:
  - Genetic testing with written education was performed.
  - Genetic counseling *only* for those testing positive.

## Methods

## Results
