

Develop the Pattern in the Handgun

As with any other pattern, we start with a single pattern before expanding options. From this single, specific example, we can then expand to other patterns, and finally to the individual requirements.

The Pattern for the Handgun

It's best to begin with a simple and common pattern, such as a basic 180°. You can then expand to other patterns, such as a 150° or 210°, and finally to the individual requirements.

Left-Handed Pattern: This is the most common for most of the population.

When you hold the handgun with the barrel pointing upwards, the barrel is to the left.

Right-Handed Pattern: This is the most common for most of the population.

When you hold the handgun with the barrel pointing upwards, the barrel is to the right.

Developing the Pattern from the Handgun

When you hold the handgun with the barrel pointing upwards, the barrel is to the left. Starting with this, we can then expand to other patterns, and finally to the individual requirements.

The pattern for the handgun will then be the left-handed pattern.

If the target needs to be moved and held, the pattern is adjusted by adding offsets. These offsets are then expanded when the target is moving. For the target with the offset, the target is held in the left hand, and the offset is held in the right hand. The offset is held in the right hand.
