Dent Jr., 2020-03-19 THE DOWNTURN IS HERE Harry Dent has been predicting for some time that we are about to enter a prolonged downturn one that will be looked at by historians as a classic economic depression due to demographic factors one of the largest generations in history the baby boomers are leaving the workplace either due to planned retirement or involuntarily due to layoffs or not being able to find work which will have a profound impact on all sectors of our economy This economic downturn could have been swifter and the pain much less had the Fed allowed it to happen naturally However due to several rounds of quantitative easing essentially pumping free money into the economy the Fed has not only delayed the inevitable but they have ensured that the downturn will be much longer and much more severe than it could have been Harry Dent believes that the Fed cannot keep the bubble from popping much longer and when it does

O'Connel,2021-05-12 Many people often associate economic downturn with lack or absence of opportunities It s simply impossible to make money much less to prosper during an economic recession or depression This is absolutely not true Because the truth is economic recessions or it s uglier cousin economic depressions are just the perfect opportunities that anyone with vision can take advantage of to

become not just rich but filthy rich For the record no less than America s second richest person alive Warren Buffet whose personal fortune reached a dizzying 48 billion before he decided to give back to the society 31 billion can attest to this Warren Buffet built his massive fortune buying businesses and properties that most people had given up as lost To many businessmen he is the great rescuer who bailed them out of their economic miseries But of course Warren Buffet saw more than rescuing them out of their economic woes If he sees no value or potential in their businesses he sees no reason to buy them But what exactly does he know that ordinary mortals don t usually know about economic downturns First and foremost economic downturns don t last During bad times Prophets of Doom would say the worst things about the economy Of course things are bad But they only remain bad to a certain point This is because of the thing called Economic Cycle Economic Cycles are periods in history of booms and busts Economic cycles are the hallmarks of laissez faire system Economic cycles behave just like the seasons And just like the seasons the climate always changes And just like the seasons you can predict a downturn or an upturn What happened just after just the turn of 20th century was a classic example of an economic boom suddenly gone bust In the roaring 20 s people thought that there was no stopping to the prosperous times Until one day people started dumping stocks at such a frenzy that it sent the whole world in probably the worst economic depression in history By all means the signs of a coming collapse were present Stocks were at all time high In fact unreasonably high And people were living beyond their means The same thing happened again with the housing market in 2007 Just a couple of years ago the sense of affluence was everywhere with home values skyrocketing Because of the high cost of home ownership many Americans were forced to borrow beyond their means The result was a credit crisis that sent the world reeling again in another round of recession So the question now is if we could predict an economic downturn could we also predict an economic upturn The answer is yes If you religiously watch CNBC or read CNNmoney com you d find that home prices had already gone low enough to attract the buyers back But how low it could get is the question Prospective home buyers are still in the sidelines waiting for better bargains The question this time is when will they decide that the price is already right enough to make them buy The following articles will open your eyes to the realities of economic cycles and the opportunities that you can take advantage of for your personal economic growth
