Time Travel A New Perspective:

Time Travel J. H. Brennan, 1997 Presents the discoveries arguments and theories in support of the existence of time travel *New Perspectives on Contemporary German Science Fiction* Lars Schmeink, Ingo Cornils, 2022-04-22 New Perspectives on Contemporary German Science Fiction demonstrates the variety and scope of German science fiction SF production in literature television and cinema The volume argues that speculative fictions and explorations of the fantastic provide a critical lens for studying the possibilities and limitations of paradigm shifts in society Lars Schmeink and Ingo Cornils bring together essays that study the renaissance of German SF in the twenty first century The volume makes clear that German SF is both global and local the genre is in balance between internationally dominant forms and adapting them to Germany's reality as it relates to migration the environment and human rights The essays explore a range of media literature cinema television and relevant political philosophical and cultural discourses *New Perspectives on Mind-Wandering* Nadia Dario, Luca Tateo, 2022-10-07 In the last decade a great variety and volume of scholarly work has appeared on mind wandering a mental process involving a vast range of human life connected with first person perspective and personhood submental thinking mental autonomy etc While different and emerging features that flow into and out of one another second field mental travel visual imagery inner speech unspecific memory autobiographical memory fantasies introspection etc and negative and positive approaches seem to describe mind wandering we offer an interdisciplinary theoretical and empirically informed and informative overview on mind wandering studies and methodologies oriented toward the educational field The aim is to transform and enrich the debate on mind wandering but also to show how theoretical arguments and research findings could inform the teaching learning context This groundbreaking book moves along three representations of developed scientific knowledge imaginary lines circles and spirals The first section The Lines develops new lines of inquiry on attention selective and sustained and mind wandering the influence of age and mind wandering embodiment consciousness and experience and mind wandering In the second section the Circles groups of Chapters on the same topic methodology tasks and measurement intervention auditory beat stimulation and mindfulness practices and creativity recreate a dance of interacting parts in which there are always profitable decisive and retroactive exchanges between the information that each group or author activates The last section The Spirals critically discusses the absence of a unified theoretical perspective in the pedagogical field attentive both to the processes of emergence and the interactions between parts *Mobilities: New Perspectives on Transport and Society* John Urry, 2016-04-22 Bringing together the leading authors currently working at the intersection of social science and transport science this volume provides a companion to the well established and extensive international Transport and Society series Each chapter and the volume as a whole offers closer and richer consideration of the issues practices and structures of multiple mobilities which shape the current world but which have typically been overlooked or minimised What this approach seeks to do is not only draw attention to many new areas of research and

investigation relating to mobile lives but also to point to new theories and methods by which such lives have to be researched and examined Such new theories and methods are relevant both to rethinking transport studies as such but are also recasting societal studies as transport so that it comes out of the ghetto and enters mainstream social science **New Perspectives on Geography of Media** SHAO Peiren,2023-12-02 Based on the ancient Chinese concept of the unity of Heaven and Man tian ren he yi guided by principles governing the connections and interdependencies between Heaven Earth Man and the media and in accord with the coexistence of these four elements in balance and in harmony this monograph outlines the scope of the study fundamental concepts and theories and future directions of research in the interdisciplinary field of the geography of media The author delves deeply into the themes of time space place landscape and scale to introduce readers to a wide array of intriguing concepts that add new dimensions to this relatively new academic field In addition this monograph presents a history of media geography as it has evolved in the West and in China over the past several decades and introduces principles and values from traditional Chinese culture that shed light on the nature direction and significance of media studies and communication research now being conducted around the globe Intended readership professional scholars graduates and general readers New Perspectives on the Hellenistic Peloponnese Manolis

Pagkalos,Andrea Scarpato,2024-11-14 This volume fills a gap in current research on the Hellenistic Peloponnese complementing and challenging traditional interpretations by adopting new perspectives on its complex social and political history The resurgence of interest in the Hellenistic period brings the Peloponnese to the front in response to emerging trends in research By examining aspects of the region s interstate relations contemporary politics and modes of representation this volume explores current research on the region creating a much more well rounded picture of the Hellenistic Peloponnese and a rich basis for invigorating scholarly debate and inspiring further research The chapters adopt interdisciplinary approaches analysing a wide array of ancient evidence and material culture As a result the volume offers a renewed understanding of how socio political transformations unfolded within the region The contributors illuminate critical agents of the period their interactions material evidence and political history both in and beyond the Peloponnese from the Macedonian influence over the region since the 3rd century BCE and the rise of the Achaian Koinon to strategies of identity construction and memory politics wielded by local elites and their manifestation in the material evidence This volume will be a crucial reference point for graduate students and scholars interested in the region **Multidimensional development of**

student-athletes: new perspectives on dual-career Ricardo Quinaud,Mojca Doupona,Laura Capranica,Flavia Guidotti,2025-10-27 Over the past decades the investigation of the dual career phenomenon among student athletes has witnessed noteworthy advancements It is well known the demands and challenges to achieve a mastery elite performance in sport combined with academic commitments However studies have reported segmented information on it mostly due to the difficulty of investigating those several aspects that influence the development of a dual career and the perspective of

adopting a unidimensional view Consequently there is a pressing need to embrace a comprehensive multidimensional view to prepare them for any future that they can be expecting Such an encompassing perspective is paramount in discerning their requisites and proactively equipping them for the diverse range of future possibilities they may encounter A singular viewpoint bereft of a holistic purview may engender misapprehensions about their dual career trajectories In light of this we want to encourage researchers to combine their knowledge with the practical context lived by millions of student athletes all over the world Thus our goal with this special issue is to bring the most recent advances in student athlete dual career and look forward to how all this knowledge can improve student athlete development worldwide from a multidimensional perspective In order to achieve these goals we encourage manuscripts on any of the following topics Student athletes dual career transitions sports policies and legislation on student athletes dual career sports management on student athletes dual career psychological measures on student athletes dual career paralympic student athlete dual career student athletes dual career programs and environments student athletes dual career supporters measures of sport and educational demands and loadings on student athletes dual career worker athletes dual career methodological approaches designs and gaps in research into student athletes dual career
