**Environmentally Sustainable Building Design Guidelines** ,2008     **Sustainable Design Guidelines** ,2018     Sustainable Building - Design Manual ,2004-01-01 The second volume targets practitioners and focuses on the process of green architecture by combining concepts and technologies with best practices for each integral design component     **Successful Development of Green Building Projects** Tayyab Ahmad,2023-06-20 Focusing on office buildings this book explores how Green Building GB development can be managed to achieve successful project outcomes The book starts by highlighting the special requirements of GBs which distinguish them from traditional buildings The book then presents a detailed discussion of the success conditions for GB projects Highlighting 73 success conditions which have been categorised within 20 broad themes the book reports on the findings from interviews with GB stakeholders from Australia Hong Kong Pakistan Singapore the United Arab Emirates and the United Kingdom The book demonstrates how the complexity design methodology and team collaboration prevalent in the delivery of successful GB set them apart from traditional building projects The book also demonstrates that success in GB delivery is generally associated with socio technical conditions The research reported in this book will allow project decision makers such as clients and project team members to consider the wide range of identified success conditions to optimise project performance across its development

stages and achieve successful project outcomes Theoretically the findings can inform future research focused on GB development resulting in the more efficient development of GB projects that can reduce the effects of climate change and resource depletion

**Portugal SB07. Sustainable Construction, Materials and Practices** Luis Bragança, Manuel D. Pinheiro, Said Jalali, Ricardo Mateus, Rogério Amoêda, Manuel Correia Guedes, 2007-08-15 The construction industry is a vibrant and active industry The building sector is responsible for creating, modifying and improving the living environment of humanity On the other hand construction and buildings have considerable environmental impacts consuming a significant proportion of limited resources of the planet including energy, raw material, water and land Therefore the sustainability of the built environment, the construction industry and the related activities is a pressing issue facing all stakeholders in order to promote Sustainable Development The new millennium is challenging practitioners and researchers with the sustainability of the built environment and the construction industry Hence the main purpose of this publication is to discuss these challenges and present solutions that actively facilitate and promote the adoption of policies, methods and tools to accelerate the movement towards a global sustainable built environment The issues presented include Building sustainability assessment tools, Indoor environment quality and benchmarks, Sustainable resources and materials use, Use of non conventional materials, Use of industrial waste, Eco materials and technologies, Sustainable management of existing building stock, Innovative sustainable construction systems and Design

**The Green Library Planner** Mary M. Carr, 2013-09-11 Green buildings are better buildings In fact buildings use 36% of the energy in the United States according to the Environmental Protection Agency so green buildings that use less energy help to address the very real challenges of reliance on fossil fuel and climate change More than only being environmentally responsible green libraries are beautiful, cost effective, high performance buildings that enhance occupant health and comfort The Green Library Planner is designed for members of library building design teams who typically are not actively engaged in architecture, construction or engineering but who need an introduction to the rationale for green buildings, the elements of green building and the language of the field It will be equally useful for public officials, boards or administrators who are considering a new green library building, a renovated library structure or sustainable elements for a current library facility Mary M Carr, a library director who is also a LEED Accredited Professional with national certification first introduces the basic tenets of green building She then covers the gamut of green building from design through all phases of construction or renovation to operations and maintenance Chapter highlights include Fundamentals of Sustainable Building, The Importance of Place, Energy and Lighting, Indoor Environmental Quality, Water Conservation and Quality, Sustainable Construction Management Techniques, Commissioning, Sustainable Operations and Maintenance With this information the librarian and related library staff and administrators will be able to design, build or renovate and operate the library in the best way possible while considering the environmental and economic challenges faced locally and globally in the 21st century

[Sustainable Building Standards and Guidelines for Mixed-Use](#)

Buildings Ranjit Gunewardane,2018-09-29 With increasing numbers of consumers becoming more environmentally conscious in their purchasing behavior environmental practices are a decisive factor in the real estate sector Reconciling the seemingly opposing goals of improving the environment and providing the needed infrastructure to support economic growth is the origin of the sustainable green building concept This concept is simply about being mindful of the potential impact that the design construction and operation of commercial buildings will have on the environment and devising innovative strategies to mitigate or eliminate these impacts This means changing the traditional process of designing buildings and their construction and operation as well as the integration of emerging trends in many technology fields into buildings The Sustainability Building Standards and Guidelines contains information intended as minimum standards for designing constructing and equipping sustainable mixed use buildings Insofar as practical these standards relate to desired performance or results or both Sustainable green buildings are as much about construction as they are about design The book includes a description of the special design features construction processes the systems of operation and maintenance and the interrelationships of these various functions Increasingly staying competitive means building owners property developers designers manufacturers and contractors are focused on achieving increasingly environmentally friendly and energy efficient buildings with the ultimate goal of producing environmentally and energy neutral buildings
