County accepts computer bid to count votes, aid jury selection

By BILL CHRISTENSEN
Special Writer

Johnson County voters cast ballots on computerized, automated ballots in 1976. When they did the voting in 1978, they used a ballot with a hole punch and a ballot box. The hole punch was used to punch a hole in the ballot, and the ballot box was used to count the votes.

But voters and voting machines will be replaced by a computerized system in 1980. The system will be used to count the votes and to select the jury.

AS FOR THE JURY, the county will use a computer to select the jury. The computer will select the jury from a list of names.

The computer will select the jury from a list of names. The computer will select the jury from a list of names.

County would have to meet with all the voters in the county. The county would have to meet with all the voters in the county.

The county would have to meet with all the voters in the county. The county would have to meet with all the voters in the county.
