**Effective Software Test Automation** Kanglin Li, Mengqi Wu, 2006-02-20 If you'd like a glimpse at how the next generation is going to program, this book is a good place to start. Gregory V. Wilson, Dr. Dobbs Journal, October 2004 Build Your Own Automated Software Testing Tool Whatever it claims, commercially available testing software is not automatic. Configuring it to test your product is almost as time-consuming and error-prone as purely manual testing. There is an alternative that makes both engineering and economic sense: building your own truly automatic tool. Inside, you'll learn a repeatable, step-by-step approach suitable for virtually any development environment. Code-intensive examples support the book's instruction, which includes these key topics: Conducting active software testing without capture/replay, Generating a script to test all members of one class without reverse engineering, Using XML to store previously designed testing cases, Automatically generating testing data, Combining Reflection and CodeDom to write test scripts focused on high-risk areas.
