Addressing the Student Loan Crisis Genevieve Dobson,2020 The Purpose of Research is to determine why student loan borrowers are making poor decisions regarding their repayment plan selection and how we could use the theory of nudge to get them to make better choices This study evaluates three main biases found in decision making to determine which one is most likely to be utilized in making decisions It also investigates ways a tool can be created to allow borrowers to make better choices I use the Elaborated Action Design Research Methodology to diagnose design and implement an effective tool In my study I create an artifact that allows me to create nudges for better repayment selection and a secondary artifact that helps me to determine if the biases I believe to be affecting decision making are accurate I also create a calculator to determine which repayment option that is available to the borrower is best based on their individual goals An interview of 41 University of South Florida students is used to obtain their feedback on which selections they would make and why My research contributes to the student loan industry Much discussion exists about issues within the industry regarding repayment of student loans and the number of borrowers who default In my professional life I have observed that many who default or struggle with repayment of loans do so because they simply are in the wrong payment program and do not get the right advice to select the appropriate option The government puts everyone into a standard option automatically Default Option forcing them to determine what if any better options exist for them If we could simply select the correct option for their needs and circumstances from the beginning much of the issue with default and past due payments could be resolved I conclude there is evidence that supports those who are given a Default option tend to choose or stay with that option because of several factors These factors include believing this option is best for them and making complex decisions can be overwhelming causing some to make no decision at all My findings also determine that Social Norm and Warning nudges can be very powerful when given a complicated choice to make

Student Loans and the Dynamics of Debt

Brad Hershbein, Kevin M. Hollenbeck, 2015-02-23 The papers included in this volume represent the most current research and knowledge available about student loans and repayment. It serves as a valuable reference for researchers and policymakers who seek a deeper understanding of how why and which students borrow for their postsecondary education how this borrowing may affect later decisions and what measures can help borrowers repay their loans successfully **How to Pay for College** Student Loan Hero, According to College Board a year of tuition at a public four year school in 1987 cost \$3,190. Now a year at that same school would cost \$9,970. College prices are increasing and going to school is more expensive than ever before. But that doesn't mean you have to resign yourself to borrowing hundreds of thousands of dollars to earn a degree. We at Student Loan Hero created this guide to a complicated financial aid system so that you know all your options and can make informed choices. I hope this encourages you to explore as many scholarship and grant opportunities as possible and navigate through the process of applying for federal and private student loans. National Audit Office - Department for Business, Innovation and Skills: Student Loan Repayments - HC 818 Great Britain: National Audit Office, 2013-11-28 Until the Department for Business Innovation and Skills BIS has a robust strategy for maximizing the collection performance of student loans and improves its information on borrowers it will not be well placed to secure value for money. BIS forecasts that the total value of outstanding student loans will increase from 46 billion in 2013 to approximately 200 billion by 2042 in 2013 prices. The number of borrowers due to repay is projected to increase from 3 million in 2012-13 to 6.5 million by 2042. The loan book is therefore becoming a substantial public asset. BIS and its collection partners HM Revenue Customs and the Student Loans Company SLC work together in a joined up way. In 2012-13 they collected 1.4 billion in student loan repayments at a cost of 27m. BIS needs to make better use of data to support its collection strategy and improve its understanding of where it could invest to maximise the collection value of the loan book. In designing how student loans would work BIS anticipated that a proportion of the loans would not be repaid. However BIS has not set an annual target for the amount to be collected because repayments are affected by graduate earnings and economic factors outside its direct control. Annual repayment forecasts are consistently higher than amounts collected. While many borrowers may not be in employment BIS and the SLC have carried out little analysis to establish how many may be working overseas or the level of repayments that may be missed. Federal Student Loans Cornelia M. Ashby, 2006-03 In FY 2004 the fed gov't made or guaranteed 84 billion in loans for post secondary ed through 2 loan programs the Fed Family Ed Loan Program FFELP. 2 what factors explain changes between re-estimated 3 which fed costs/revenues associated with the student loan programs are not included in subsidy cost estimates. Charts/tables. *Exit Counseling Brochure*, 1994 *Sunk Cost* Jillian Berman, 2025-04-08 Exposes the forgotten origins of the student loan system how politicians have attempted to fix it and the life altering damage borrowers face. Student loan horror stories are a dime a dozen. But students today are faced with a seemingly insurmountable paradox. Research consistently shows that the clearest viable option to financial stability is a

college degree But if and when Americans decide to pursue diplomas student loan payments quickly follow and even after securing full time employment many borrowers struggle to make ends meet for years In Sunk Cost journalist Jillian Berman explores how the nation s student loan program went from a well intentioned initiative aimed at helping low and middle income students afford college to one that traps borrowers in long term debt Berman interviewed dozens of borrowers and policymakers and dug into the archives to unearth the true causes of the student loan problem A couple of generations ago policy makers generously subsidized Americans college educations because they knew it would be advantageous for the entire country a more educated population meant better quality of life for all But today higher education is viewed as an individual goal so students and their families are expected to be on the hook for it themselves Berman explains how this enormous shift happened which industries benefit from it and what it means for college going Americans today She shares real life stories of college graduates who are being crushed under some of the harshest consequences of the student loan system These borrowers pursued higher education in hopes of a better life and yet some have been trapped in debt for decades making it difficult to put food on the table much less imagine a life beyond debt By connecting personal accounts to the policy history of student loans Berman makes clear that if American society continues to push students toward higher education but fails to truly subsidize it the financial strain will become unbearable for all but the most privileged The current system is broken but Berman proposes that significant changes are possible and will require political will from state lawmakers and Congress along with a philosophical shift to tackle one of the largest consumer finance challenges of our time

Student Loan Repayment Guide ,2006 **The Biden Student Loan Forgiveness Plan** Junlei Chen,2022 President Biden s new student loan forgiveness plan includes three major components We estimate that debt cancellation alone will cost up to 519 billion with about 75% of the benefit accruing to households making 88 000 or less Loan forbearance will cost another 16 billion The new income driven repayment IDR program would cost another 70 billion increasing the total plan cost to 605 billion under strict static assumptions However depending on future IDR program details to be released and potential behavioral i e non static changes total plan costs could exceed 1 trillion
