## Earth's Magnetic Field

1. Is Earth's magnetic north pole at its geographic north pole? Explain.
  - Earth's magnetic north pole is actually geographically south. This explains why the north pole of the compass is attracted to geographic north.
2. How does a compass respond when it is placed in the magnetic field of a bar magnet?
  - The compass will be attracted or repelled by the magnet depending on which pole it is facing.
3. What is the cause of Earth's magnetism?
  - Earth's magnetism is the result of its liquid iron-nickel outer core.
4. Why does a compass point north? What polarity is the North Pole?
  - A compass will point north because it is attracted to the south pole of earth's magnetic field. The geographic north pole is actually a south magnetic pole.
5. What is magnetic declination?
  - Magnetic declination is the angular difference between the magnetic north and geographic north from that location.
6. What has happened to the strength and location of Earth's magnetic field in the past?
  - The magnetic field has reversed several times in Earth's history. The field has also weakened on occasion.
7. Suppose Earth's magnetic field were to change so it looks like the picture to the right. If you stand at the marked point, in which direction will your compass needle point? What is the approximate magnetic declination at this point?

covers such a wide range of topics and issues that it becomes difficult for readers to see the forest for the trees To make key psychological concepts more meaningful the authors found inspiration in a classic chess study This study showed that experts did no better than novices at remembering the location of pieces on a chess board when they were placed randomly Only when the patterns represented actual game situations did they make sense and therefore become more easily memorable for the experts Clearly meaningful patterns are easier to remember and understand than random arrangements and Psychology applies this by presenting the field of psychology in meaningful patterns to enhance comprehension These concepts are then applied to readers own lives study skills and the world around them Finally Psychology integrates a cross cultural and multicultural perspective to make psychology meaningful for everyone For anyone interested in Introductory Psychology
